Thankyou for downloading this software from Double Oak Software. This software started out in the Shareware market but was changed over to Demoware in order to increase the number of registrations. I have had increasing success and recently was written up on the ziffnet and in CompuServe Magazine (Download Notables).

The entertainment and education software that I write is geared toward a family looking for non-violent entertainment. The following features have been design into each game.

- Easy to learn.
- Multiple levels of difficulty to challenge players of all capabilities.
- Quick play, suspend play, and save game (useful for those corporate types who need a break from a busy schedule).
- Tight code to minimize hard disk space.
- Thoroughly tested.
- Game speed independent of processor speed.

To install the software onto your hard drive:

1. Make sure all the files listed in FILES.TXT are in the same directory.
2. Run the INSTALL.EXE file that was unzipped from the sip file.

This software is for your review only it is Demoware. It is not to distributed as Shareware in any form without my written consent.

I feel that these programs are well designed, bug free, and entertaining which will appeal to a wide audience.

Ordering Information

The software you have downloaded is DEMOWARE. As DEMOWARE it is a complete working copy of the original, with the restriction that after you have sampled the software a limited number of times, it will no longer load. The registered version of the software will allow unlimited use and will not display the registration warning when it loads.

Sample other Double Oak Software titles by searching for files with the key word DBLOAK or Double Oak.

All games are designed to operate on any system which is running Windows 3.1. Game speeds are independent of processor speed.

Ordering a registered version of the software is as easy sending a check or money order for $14.00 (US dollars) to:

Thomas A. Johnson
Double Oak Software
125 Double Oaks Drive
Lewisville TX 75067
