

Working Implementation Agreements for Open Systems Interconnection Protocols: Part 13 - OS Security

Output from the December 1993 Open Systems
Environment Implementors' Workshop (OIW)

SIG Chair: **Dr. James Galvin, Trusted Systems Information**
SIG Editor: **John Hooder, NAVY, Dr. Mohammad Mirhakkak, MITRE**

Foreword

This part of the Working Implementation Agreements was prepared by the Security Special Interest Group (SECSIG) of the Open Systems Environment Implementors' Workshop (OIW). See Part 1 - Workshop Policies and Procedures in the "Draft Working Implementation Agreements Document" for the workshop charter.

Text in this part has been approved by the Plenary of the above-mentioned Workshop. This part replaces the previously existing chapter on this subject. As agreed at the Editors' Meeting during the March '92 Workshop, since there were no changes to this text as previously given, the part will not be reprinted for the Working Document. Please refer to the Working Document which was issued on March 9, 1992.

Future changes and additions to this version of these Implementor Agreements will be published as a new part. Deleted and replaced text will be shown as strikeouts. New and replacement text will be shown as shaded.

Table of Contents

Part 13 - Future Security 1

Part 13 - Future Security

Editor's Note - This part points to future stable Security agreements which are contained in Part 12 of the Stable Implementation Agreements, Special Publication 500-202, Version 5, Edition 1.

Editor's Note - Previous Working Agreements may be found in part 12 of this document.
