# CREATOR2™

# 1.6.2 Quick Full Install Guide

**Note to Creator2 1.5–1.6.1 users:** If you wish to retain the preferences you set in 1.5–1.6.1, do not proceed with these instructions. Instead, refer to the "1.6.2 Quick Updater Guide."

1. Insert the Creator2 1.6.2 CD into your CD-ROM drive and double-click the CD icon.

2. Double-click the **Creator2 1.6.2 Installer** icon.

3. Click **Continue**. Read the license agreement and click **Accept**.

4. The **Read Me** screen appears. This file has important late-breaking information for you. Later, this file will be located in the Multi-Ad Creator2 1.6 folder. Click **Continue**.

5. In the next dialog, select the install method you want from the pop-up menu in the upper left corner. Choose between **Easy Install** and **Custom Install**. Custom Install lets you choose which Creator2 1.6.2 components you want. If you select this option, a module list appears; click on a checkbox to install an individual module.

6. After you have selected an install method, click on the **Install Location** pop-up menu located at the bottom of the dialog. Then choose the location where you want the program files installed. All mounted drives are listed.

7. Click **Install**. A progress bar appears telling you when items are placed on your Macintosh. If you need to halt the installation, click **Stop**.

8. Creator2 1.6.2 is installed! Click **Quit** and then **restart** your computer.

9. If you are missing **ColorSync®** and/or **Adobe Type Manager® (ATM)**—additional software Creator2 needs to run properly—install them now:

• **For Mac OS 9**, use ColorSync 3.0 or newer and ATM (Lite or Deluxe) 4.5.2 or newer. ColorSync 3.0 is installed by the Mac OS 9 installer. The ATM Lite 4.5.2 installer is on the Creator2 1.6.2 CD.

• **For Mac OS 8.1 through 8.6**, use ColorSync 2.5 or 2.6 and ATM 3.8.3 – 4.5.1 (or a version newer than ATM 4.5.2). The ColorSync 2.5 and 2.6 installers and the Acrobat Reader 3.0 installer (which installs ATM 4.0.2) are on the Creator2 1.6.2 CD.

• **For Mac OS 8.0 or older**, use ColorSync 2.5 and ATM 3.8.3 – 4.5.1. The ColorSync 2.5 installer and the Acrobat Reader 3.0 installer (which installs ATM 4.0.2) are on the Creator2 1.6.2 CD.
