above. Allow 3-4 weeks for delivery; slightly longer if paying by personal check; significantly longer if paying with rubles.

You may also obtain a powerful shareware Compact Disk database program for Windows when you register Simone. This program is ideal for owners of multi-disk CD players such as Pioneer's 6 disk and SONY's 10 disk players. It's feature-packed with wildcard find and browse functions; drag-and-drop editing; customized print-outs; and multiple description fields such as CD name, artist, song name, music type, and user defined type. This program allows you to quickly and easily search through any sized CD collection with all the information at your fingertips. You'll never search rampantly through your disks for that certain song again!
