

LEMMINGS

CHEAT

This file will drastically aid the average Lemmings gamer in his/her quest to save the short, green-haired Lemmings from certain death. Basically, I used ResEdit to change the "Levels" file so that you now have 99 of each type of Lemming, 99 minutes to complete each level, and a release rate of 1. I did not change the number of Lemmings in each level, nor did I alter the number of Lemmings that have to reach the goal. While you probably won't want to play any of the "fun," "tricky," or "taxing" levels, the "mayhem" levels will nevertheless take you a while to complete. The following document contains this intro, installation instructions, and ResEdit tips for editing the "Levels" file.

"SuperLemmings" is freeware, and, for those who read the ResEdit section, you can see that editing the "Levels" file really is

not that hard. If this will add a few years to your life, and you feel forever indebted to me, or if you just like it, send me some E-mail. Any bugs, whatever, my E-mail at AOL is Chris01134 (hEllo upside-down).

Of course, if your system crashes, explodes, or fails to work after using this file, I officially release all liability. The above really should not happen, though.
