

End'r 1.9

Log-off Usage Report Generator!

End'r displays a report to the caller at log-off. This report contains information about the number of times the caller has called your system, number of minutes on, number of uploads, number of downloads, and number of e-mail and public messages posted. End'r displays the date of the caller's first call to your BBS.

A special message is displayed at the end of the report which reflects the contribution that the caller has, or has not made to your BBS. The text of this message is configurable by the SysOp.

Killer/Keeper End'r also asks first-time callers to your BBS whether they will be calling back and deletes their user record if they respond 'No'.

Feature List

- 1] End'r offers four different report formats — (wide, long, short, and monthly -- the 'monthly' format is especially designed to be used with the *FileControl'r* option in *UserManage'r*, part of CT Pak #2).
- 2] The report is automatically displayed at log-off.
- 3] Remote operation. End'r is configurable either logged on locally or by calling in from remote.
- 4] Displays a "New Caller" file to first-time callers. New callers who choose not to call back will have their user records deleted by End'r. This feature is helpful in keeping the

size of your Hermes Shared file to a minimum.

Setting Up End'r

Put End'r and the End'r Files folder in your Externals folder and restart Hermes. Log on as User #1 and select End'r from the Externals List.

Choose "A> Report format"

Choose the format you wish.

Choose "B> Contributor message"

Contains the message you want to be displayed to those callers whose uploads are greater than their downloads--the Contributors.

NOTE: The length can be up to 78 characters.

Choose "C> Leech message"

Contains the message you want to be displayed to those callers whose downloads are greater than their uploads--the Leeches.

NOTE: The length can be up to 78 characters.

Choose "D> BBS name"

Enter the name of your BBS. This will be displayed at the end of the usage report.

NOTE: The length can be up to 45 characters.

Choose "E> [PAUSE] before report"

This will toggle on/off a [pause on screen] before the display of the End'r report.

Choose "F> New Caller Keeper/Killer"

This toggles on/off the display of the prompt and New Caller file to first-time callers.

NOTE: All Bulletins are listed to the caller as either ANSI or TEXT, based upon their settings. YOU MUST append ".ansi" to the end of the ANSI version, but it is not necessary to append anything to the TEXT version. (This is different than in previous version of End'r).

That's all there is to setting up End'r! I recommend changing the Contributor and Leech messages every week or so. This will help "personalize" your BBS to your callers.

Problems

Support for all CT Extensions can be found on two locations. The **primary** support location is Currents! BBS, the **secondary** support location is Olympus. Any problems should be reported to me either on Currents! (513) 253-2476 or the Hermes Support BBS (310) 275-6975.

Thanks!
Randy
