

TeleFinder™ Pro

TeleFinder Pro is the only Macintosh® communications software that combines an object oriented graphical user interface with terminal emulation, macros and auto dial.

TeleFinder provides three methods of connecting with other computers:

- As a TeleFinder client you can access TeleFinder Group Edition Bulletin Board systems around the world that provide electronic mail, group discussions, file sharing and business services. You can also connect to other users of TeleFinder Pro to share files direct from your hard disk.
- As a Remote Access Host you can provide controlled access to files on your hard disk to other users of TeleFinder Pro.
- Using TTY terminal emulation TeleFinder Pro can link you to a number of text-based commercial and public services like CompuServe®, GENIE™, Delphi and others. A Macro scripting language is included to automate logon sequences.

Features:

- System 7 savvy
- Universal connectivity.
- Includes high-speed 32 bit ZMODEM and XMODEM file transfers.
- Communications toolbox compatible.
- Dialing directory to access up to 250 services.
- Macro language.
- \$79.95 per user.

TeleFinder Pro requires a Macintosh Plus or higher with System 4.1 or later. 1Mb Ram required. TeleFinder Pro is System 7.0 friendly.
