

# New! TeleFinder Group Edition Version 3.0

## Macintosh multiline bulletin board system software

The leading Macintosh Bulletin Board System in business and education. First in quality and performance. Awarded Macworld "World Class" award as the Best Electronic Communications product for 1992 by *Macworld* Australia. "The most useful BBS we've seen" *MacUser* (UK, 4 Mice Rating).

TeleFinder keeps you in touch with off-site colleagues, clients and friends. Use TeleFinder for electronic mail, public messages, and file transfers, any time of day or night.

Over 175,000 Macintosh users are members of TeleFinder BBS's at over 2,000 sites around the world. Sites include Pitney Bowes, Canon, Toyota, hundreds of PostScript Service Bureaus, schools, and Macintosh User Groups.

### **New Features!**

- Manage up to 32,000 users with complete remote sysop capabilities including adding, deleting, and changing user privileges.
- BBS runs using a modular "multi-server" architecture for maximum flexibility and efficiency. You can even run nodes of the BBS on separate computers.
- System 7 "Savvy," and 32-bit clean. Includes full balloon help for TeleFinder/User.
- You can control the all the TeleFinder programs with AppleEvents.
- Automatic on-line registration for both graphic and terminal interface callers.
- Unlimited paths, custom icons, and separate privileges let you customize the BBS the way you want to.
- Use "BBS Find File" to let TeleFinder search for the files you want.
- Menu driven Terminal Interface with TTY or ANSI Graphics option.
- TeleFinder/User is compatible with System 7, System 6, and all Mac's, from the Plus through the Quadra!
- The TeleFinder license allows unlimited distribution of TeleFinder/User.
- With TeleFinder/User you can connect to any TeleFinder BBS.
- TeleFinder maintains a detailed list of connections and transfers to the BBS in data base compatible format for billing or statistical analysis.
- Fidonet/Tabby compatible.
- Set up an "in house" BBS using NetConnect™.

TeleFinder also includes the fast ZMODEM file transfer protocol. ZMODEM file transfers have file recovery capability. TeleFinder will continue interrupted file transfers from where they left off!

Enclosed you'll find a fully functional TeleFinder Group Edition version 3.0 demo disk. This is a fully working copy of the bulletin board software. Use the TeleFinder/User demo to call our bulletin board and explore TeleFinder's features as a user. Use the Group Edition Host demo to set up your own BBS.

Each TeleFinder Group Edition comes with BBS host and user software for the Macintosh, full documentation, and a 30 day money back guarantee. TeleFinder Group Edition is \$425 for unlimited users, and multiple nodes on a single CPU. If you have any questions, or would like additional information, please call us at Spider Island Software, (714) 669-9260.
