

Recipes +

General information

First of all this is FREeware, COPYWRITED TO ME ; LUC EKSTEIN; so you can't sell it yourself, or give it away as an incentive to buy something else so there !..nna..nna...nna!!!!

But apart from that it's yours and you don't own me anything except, maybe some ego stroking feedback.....Love that feedback !!!

Also feel free to adapt the layouts to your needs (large screen etc..)(I Have an extra printout menu myself, that combine all 3 input layout).

This version does calculate teaspoons, and also as 12 ingredients fields.

This version is pretty slow, at least on my Mac+.

Now if anybody out there has any ideas how to streamline, clean up, beautify or render more efficient those nasty calculation fields, or maybe find a way to use a matrix....please..please ..let me know !!

Next, I'll be working on a shopping list file to export those recipes to.

By the way folks, did I mention that I would love a job, doing this kind of thing full time.
