

## View Menu

- Choose View by Name to sort the trace names by the Name field.
- Choose View by Device Type to sort the traces by their NBP types (e.g. LaserWriter).
- Choose View by Node Number to sort the traces in numerical order by the AppleTalk node number.
- Choose View by Percent Drops to sort the traces by the percentage of dropped packets.
- Choose View by Recent Drops to sort the traces in the order of their most recent drops.
- Choose View by Selected to bring the currently selected traces to the top of the list.

In the Spreadsheet view, clicking on any of the four column headings items —"Name", "Type", "Node" and "%"— is equivalent to selecting the corresponding "View by..." menu choices.
