News

2.0.4

•

Fixes bug which caused number base switching to fail when selecting new network number.

2.0.3

•

Now tests all devices on EtherTalk wire when no router is present. Also starts up faster since we don't poll the router when it isn't present.

2.0.2

•

Fixed display bug in Network: pop-up menu for network numbers >32767
•

Fixed bug when there were >128 devices on a network

2.0.1

•
