System 7 ResEditors
      (ResEdit 2.1.1 Editor Resources for System 7)
      Version 1.1 by Alan Coopersmith, January 1993

These are TMPL resources to be installed in your
"ResEdit Preferences" file. They allow your copy of
ResEdit™ to make some (but not complete) sense of
the following resource types:

aedt - Apple Events Template
dflg - ddev Flags
eppc - EPP Configuration
gmcd - "Guard Mechanism for Compression/Decompression"
mppc - MPP Configuration
mitq - Default Queue Sizes for MakeITable

These resource editors (or more precisely, templates)
are based on information contained in the document
SysTypes.r (©1986-1991 Apple Computer, Inc.)

These documents may be distributed only as part of the
System 7 ResEditors 1.1 set. (See the "ReadMe" file
is included with the ResEditors set for more info.)
