F1F4

Version 1.3
Compatible with Finder 6.0/System 4.2
©1987 by David Hirsh
Permission granted for public distribution

DESCRIPTION

F1F4 allows Mac SE/II users who have the EXTENDED Apple keyboard to make use of the function keys F1(undo), F2(cut), F3(copy) and F4(paste) within all Macintosh editors and DAs that adhere to Apple software guidelines.

INSTRUCTIONS

1) Place the file F1F4 in the System Folder.

2) F1F4 will automatically be installed at startup. A function key icon   will appear in the upper left corner of the startup window indicating   installation has taken place. If the function key icon appears with an   'X' in it this indicates it was not installed due to insufficient memory   in the system heap area.

3) Function keys F1..F4 may be used for their respective editing functions.

HAPPY EDITING

This is a **SHAREWARE** product.
It's ONLY $1.00

PLEASE.... Drop a buck for the outta luck
