

a division of PromoVision

Welcome to PromoLogo, your Logo design firm that will bring you and your business into the 21st Century.

As in hundreds of other areas, like computer equipment, accounting jobs, and of course the advertising business, you usually get what you pay for. This has been the trend for last decade or more. We at PromoLogo are out to change the past, and bring logo designs, and promotional material down to prices, that both small starting businesses, and large corporations can afford. This allows smaller business to get the same quality logo that a multi-million dollar business has, and allows the multi-million dollar business to spend less on logo design, and more on bettering there product or sevice.

We start out with a basic idea, and work from information you give us, and possible ideas you would like implemented, thus giving your logo a little taste of your own, yet with the professional job and ideas of expert Logo Designers. Here is what just a few of our latest clients told us...

"You've created a "winner"! We are impressed..."

"Thanks for the great turn-around time. We asked for a simple, yet

effective way to communicate our corporation and you did it!"

- Bruce A. Sokolove • Field Training Associates

"We've tried others, but yours was the BEST! Great work!"

- Mark Grayson • Creative Solutions

"Usually, you pay for what you get, but your service offers logos that normally sell for \$500 or more!"

- Dave Falk • Modern Age Computers

We love the response we have gotten from our clients. We are proud that they think so highly of our business, because we have given them a unique way to promote their business!

Unlike other Logo Design firms, we do not use logo design programs, or take ideas out of logo design books. All logos are unique in their own way. All designs are that of the artist's doing the work, and therefore are original.

We specialize both in the basic simple designs, and complex variety logos.

Through out our study, we find that most Logo Design firms normally charge on an average of around \$100 initial charge, plus anywhere from \$80-\$500 more depending the complexity of the Logo, or what the client wants, whether it be color, or B&W.

We have taken all this into consideration, and we have found out that by charging a one time charge fee, no setup fees, we can do a job for around \$50-\$100 depending on complexity and time of the job. Majority of the jobs we do for clients are \$70 or less!

Our clients also enjoy the variety of marketing and promotional ideas and forms available to them after requesting a logo, for a low, low price.

Another reason why we are able to design a logo for you at such a reasonable price is that we deal over online services, dropping typesetting fees, and other fancy forms of getting a logo to you. What we do is send you after your final payment a Logo that is in EPS format, or any other format you choose, allowing you to paste this logo on or in any publication that you make, or use. This way everything comes out just like on the screen. This cuts down on time and printing costs.

We work with you after you choose us to design your logo. We may submit several ideas to you, to pick from and then enhance the ones you like to end up with a final logo. After an initial logo request, turn around is less than 48hrs. Final logo can be finished in just a few days, or may take weeks, depending on your availability to view and analyze sample logos before the final one is produced. Once you find a logo design that you like, you then send us our fee, which is stated before this whole process begins. Once we receive your fee, we will upload the final file, Logo in EPS format in several sizes, and allow you to our other marketing and promotional forms and ideas!
