

Blabber Mouth NBA 1.0 by Michael O'Keefe

If you have the Speech Manager installed this NBA allows your computer to talk to you. Just type in what you want the computer to say and that's it! You can also type in the name of one of your text fields and Blabber Mouth will read what's in the text field. One note: this version of Blabber Mouth will only read the first 250 characters of text.
