

Welcome to SuperConcentrated. I hope that you will enjoy this game, as much as I enjoyed writing it. The object of the game is simple. Select two tiles from the board and try to match them. Points are scored as you match pairs. SuperConcentrated allows you to play with two people or one person and the computer. If you ever wish to abort the game (why on Earth would you? Perhaps because you are losing?), press the Escape key. SuperConcentrated is Shareware. That means two things: (1) Give a copy to all your friends and enemies, use it to gain upload points, (its big enough). (2) Pay \$10.00 (Cdn or Am) to support the program's future development, and support local charity (Yes, I'm a nice guy). Also I, just love comments, good or bad. Believe me feedback is a programmer's best friend. (Next to the computer). Hopefully, with enough support, a new and better version will be out at the end of April 1993. It will be packed with great new enhancements such as a timer, mid-reshuffling, a high scores list, adjusting playing control, etc. and any bug fixes. (There shouldn't be any, but stranger things have happened.) Oh yes, I am not responsible for any damages created by this program. (There is more chance that Star Trek TNG will be cancelled than this program crashing.) Remember that SuperConcentrated requires System 7.0 or greater, and 256 or more colours to run. (Sorry B&W's, maybe next time). Please send payment to: SuperConcentrated, c/o SpareTime Inc. 6 Zaph Ave, Scarborough, Ont. Canada. M1C 1M6. If you would to send me a message, I'm on the Magic BBS (1-416-288-1767) and Apple's OneNet (1-415-948-1349). Thanks to: Monica, Marja, Sai, Billy, Hoang, Stuart, Mike "Dee" Y, Mark. SuperConcentrated is ©1993 by SpareTime Inc. Any alteration of the program is illegal and not very nice.
