

The Space Madness Demo

Welcome to the Space Madness Demo!

This manual is a trimmed down version of the manual you get with Space Madness. All of the pictures have been deleted, and some text has been trimmed. This is to save downloading time for people who have to pay to download the demo.

This demonstration version of Space Madness is designed to give you a good feel for what's in the full version. It does not include everything that is in the full version!

You are allowed to play only three levels in this demonstration version. When you have completed the third level, the game will stop. The levels you get to play are not contiguous, so the difficulty curve in the real version is not quite as steep as it is here. The levels in the demo version are approximately equivalent to levels 3, 8 and 10 in the real version.

Space Madness is available now directly from High Risk Ventures. See the Ordering chapter in this manual or the Ordering screen in the game for ordering information and instructions.

Space Madness is also available from Mac's Place, and will soon be available from other major mail order houses. It will not be available in stores until fall.
