MPOA Update

- **Defined Mandatory Behavior for Edge Device**
  - EDFG must recognize flows based on destination
  - ICFG & RSFG may recognize flows
- **Eliminated Proxy Registration of hosts behind edge devices**
- **Simplified, Revised, and Clarified EDFG behavior**
 - Established a clear demarcation between bridging and routing
- **Defining Extension to NHRP**

IETF - ION   June 24, 1996

NHRP Extensions

- **Extending NHRP to deal with Edge devices**
- **At Ingress Edge Device can/must Initiate Query**
- **Defined a semantics of a Trigger to allow a route server to request an Edge Device initiate a shortcut**

NHRP for Egress Edge Device

- **Defined semantics of a cache imposition protocol**
  - Allows Route Server to notify ED to expect flow and establish the encaps
- **Adopted Flow TAGs**
  - Solves a technical problem on exit cache conflicts
  - Allows optimization of exit processing for EDFG
  - Defined a format for Tags and an encapsulation for carrying them in data frames
