

Thank you for purchasing Internet Surfer: Getting Started

-Over View.

This CD is a collection of Internet software tools. Read Zen and the Art of the Internet, this book is very informative and helps answer some of the questions you will encounter when using the Internet. While we have tried to provide you with the best start possible neither the author(s) of the software or Wayzata Technology can guarantee or be held responsible for the performance of any of the software on your computer.

-What is the Internet anyway?

The Internet is a network of computers with 35,000,000 users that spans the globe. You can find government, education and commercial computers that can be accessed from Internet. Once you connect your computer will be part of the network and you will be part of the Internet community. This is the Information Super Highway as it exists today.

-Installation

Start Windows. Select "RUN" from the File menu. Type:
D:\install (where D is your CD-ROM drive) and press <ENTER>.

-Copying files needed to your Hard Drive.

Type "D:\copyme" where "D" is the letter for your CD-ROM drive. Click "OK." Once done, there will be a directory named Wayzata on your Hard drive. Inside is a directory named Internet, this contains the Internet software WinSock (Tcpcman).

-Creating the Group with core Internet Programs.

Select "RUN" from the Program Manager. Type "C:\wayzata\setup" Click "OK." This will install Tcpcman, Eudora, WinFTP and NCSA Mosaic on your system to get you started. The rest of the software is on the CD-ROM drive in the Windows\More directory. You may copy these over at a later time and install them as per the instructions with the programs in their respective directories.

Installing WIN32S (this is needed for NCSA Mosaic). From the Program Manager File menu select "RUN." Type: D:\Windows\WIN32S\setup.exe (where D is your CD-ROM drive).

-Setting up your software to connect to the Internet.

HoloNet, one the nations largest Internet providers, is offering a special sign on deal for you. Use the enclosed coupon, worth \$100.00, to receive FREE HoloIP service (normally \$75.00) and \$25.00 worth of usage credit. We have our own account with HoloNet and we feel that you will be very satisfied with their high quality service.

Holonet's IP service gives you full access to the Internet right on your desktop. You will need to use the enclosed coupon to create an account with HoloNet. HoloNet is accessible nationwide.

Call HoloNet Tech Support at 1-510-704-0160 if you have any issues setting up your new account.

Normal rates for monthly service are:

Network	Peak M-F 8am-5pm local time	Off-Peak
CPN(USA)	\$6.50/hr	\$4.50/hr
CCA (Canada)	\$8.50/h	\$6.50/hr

Refer to the file ReadME Tcpman for proper setup of your connection software.

-Example signon

Double click on Tcpman. From the Dialer menu select Manual login. Type: atdt#### (where #### is your local Holonet access number). When you see: connect xxx, press <Enter>. At the "Service" prompt type: holoip and press <Enter>. At the "Name" or "Member" prompt type your login name (example: jsmith). At "Password" type your password (note: when you are typing your password nothing will appear on the screen, this is for security). At :Terminal: type: ppp or slip (which ever one you selected in Tcpman setup). If you select slip wait until you see a display of numbers then press <ESC>, you should now see "Slip Enabled." Are are now connected to the Internet. If you select "ppp" wait until you see a display of characters including "{" then press <ESC>. You are now connected to the Internet.

Refer to the file HoloSlip.TXT located in the Holonet directory on the CD-ROM for more information on settings and sign on procedures.

-A word about viruses.

Viruses mean trouble! Be careful when downloading and using files from the Internet. Assume that nothing is safe and have up to date virus protection software operating at all times.

-The range of information available to you as an Internet user is very broad and some may be very offensive to sensitive viewers, discretion is advised.

ABOUT SHAREWARE...

Shareware (also known as user supported software and other names) is a concept not understood by everyone. The authors of Shareware retain all rights to the software under the copyright laws while still allowing free distribution. This gives the user the chance to freely obtain and try out software to see if it fits his needs. Shareware should not be confused with "Freeware" or Public Domain software even though they are often obtained from the same sources.

If you continue to use Shareware after trying it out, you are expected to register your use with the author and pay a registration fee. What you get

in return depends on the author, but may include a printed manual, free updates, telephone support, etc. Only by paying for the Shareware you use do you enable the Shareware author to continue to support his software and create new programs. Considering that the Shareware registration fees are almost always far less than the purchase price of comparable retail software it's obvious that Shareware is a good deal for everyone.

One common misconception is that the author receives payment from the disk distributors. This is not true; the small fee that you initially pay a distributor to obtain an unregistered copy of a Shareware program only pays for the distributors costs. You are still expected to pay the registration for any program you continue to use.

There are real advantages to you in the Shareware system. You get to try out software to make sure it is compatible with your hardware and that it fits your needs before you buy it with your registration. The author saves the expense of advertising, packaging and distribution and passes the savings on to you. Plus, most Shareware authors are much more accessible than retail software sources so that your questions and suggestions are much more likely to be responded to.

Once again thank you from Team Wayzata (WayzataTec@aol.com).
