

Wacky TV Help

Your Wacky TV is definitely not just another television set. You can either sit back and watch digital movies, or jump in and add exciting special effects to the show. Choose the movie you want to see from your Kid Pix Studio digital video library. Use movies you have created with Kid Pix Studio and saved using the "Save for SlideShow" command under the **File** menu.

Open digital movies from other sources, like CDs and video capture programs. Throw in some special effects with the Electric Mixer, and you'll be amazed. Click on the Electric Mixer icon at the bottom of the Wacky TV, and your tool options will appear. Your added effects will not be saved over the opened movie.

If you arrived at the Wacky TV via the Kid Pix **Goodies** menu, you can use the Paste Jar to stick your movie right onto the Kid Pix screen. Select the movie you want to use, and click on the Paste Jar. You will go directly to Kid Pix, and the movie you have selected will be available for pasting. Paint a picture around it if you choose to, and select Play Movie under the **Goodies** menu at any time to make your movie move! If you arrived at the Wacky TV via the Studio Picker, click on the Return to Studio icon to end your Wacky TV session.
