Help Topics

New features in version 1.1

- Configuration is now automatically saved to a file.
- Ultra Logic ensures that the user did not leave any blank pieces.
- An installation program has been added.
- The help window is automatically closed when Ultra Logic is closed.
- The user interface has been redesigned, making it easier to use.
- The background music has been changed.
- A new game statistics section added to the About box.
- Dynamic board implemented. Now you can resize the board to any size!
- Three different game levels added: Beginner, Intermediate and Expert.
- The time indicator has been changed and now looks like a real timer.

Support

You can contact the author at the following addresses:

Internet email:

Suggestions and bug reports as well as general comments are always welcome.

Getting the newest version

You can find pointers to <u>FTP</u> sites that carry the latest version of Ultra Logic on our <u>WWW</u> page. The address is: **http://www.student.toplinks.com/hp/vitaly/ulogic**

Registering Ultra Logic

Ultra logic is being distributed using the shareware concept. If you have been using Ultra Logic for more than 21 days you must register. Registration is very easy and fully automated. All you have to do is fill out the registration form (Help|Registration Form menu).   After completing the form, print it by clicking the print button and send it with the registration fee to the author. The author's address and the total registration amount can be found on the form itself.

After the author receives your registration you will be sent a special registration number which you will be able to enter   into the Registration Code dialog (Help|Enter Reg Number menu). After verifying the code Ultra Logic will register itself and all the features will be fully enabled. The same registration number can also be used in all future versions which can be obtained for free via the Internet (see Where can I find the newest version)?

License Agreement

Users of Ultra Logic ("program") must accept this disclaimer of warranty: The program is supplied as is. The author disclaims all warranties, expressed or implied, including, without limitation, the warranties of fitness for any purpose. The author assumes no liability for damages, direct or consequential, which may result from the use of the program.

The program is a "shareware program" and is provided at no charge to the user for evaluation.   Feel free to share it with your friends, but please do not give it away altered or as part of another   system.   The essence of "user-supported" software is to provide personal computer users with quality software without high prices, and yet to provide incentive for the Programmers to continue to develop new products.   If you find this the program useful and find that you are using the program and continue to use the program after the trial period (21 days), you must make a registration payment of 5 US$ to Vitaly Livshits ("author").   The 5 US$ registration fee will license one copy for use on any one computer at any one time.   You must treat this software just like a book.   An example is that this software may be used by any number of people and may be freely moved from one computer location to another, so long as there is no possibility of it being used at one location while it's being used at another. Just as a book cannot be read by two different persons at the same time.

You are encouraged to pass a copy of the program along to your friends for evaluation.   Please encourage them to register their copy if they find that they can use it.

Definitions

Shareware distribution gives users a chance to try software before buying it. If you try a Shareware program and continue using it, you are expected to register.

File Transfer Protocol - Internet protocol for copying files from one computer to another.

World Wide Web - Internet protocol for viewing interactive pages.

General

Closes this dialog and saves any changes you've made.

Closes this dialog without saving any changes you've made.

Properties Dialog

Enables or disables the background music (MIDI) during the game.

Smart Hint is a special type of online help that is displayed when the player leaves the mouse over an icon in the toolbar for a few seconds.

If selected then the checking of the current row is performed automatically after filling in all the spaces. If not selected then the check will be done after pressing the check button.

Registration Form

The name of the person registering Ultra Logic. This name will be used by the author to calculate the registration number.

Your e-mail address or your postal address will be used for sending you the registration key.

Your postal address or your e-mail address will be used for sending you the registration key.

The registration number can be delivered to you by email or regular mail. Please select the preferred method.

Number of copies of Ultra Logic you wish to order.

Prints the registration form. You will be able to change printer properties later.

Main Form

The computer displays the results of your move on this board. It places a black piece for each piece you guessed correctly and a white piece for each piece that is on the board, but isn't not in the correct position.

This timer displays the number of seconds since the beginning of the game.

These are the possible colors that are used in the combination that the computer chose. To place them on the board simply drag and drop them.

Custom Form

Use this track bar to set the number of columns on the board.

Use this track bar to set the number of rows on the board.

These dimensions of the board will be set after you click OK.
