

Suggestions For Using MacFlash

Here are some ideas that you may wish to consider if you plan on considering to use MacFlash...

- For each chapter/lecture/section that you are studying, make up a single deck for that section. Then, when tests that cover multiple chapters come around, you can quiz on all the appropriate decks at the same time without having to make up a new deck.
- Similarly, you can create decks along the lines of categories (such as parts of speech in foreign languages), and quiz on them separately or together.
- If you are a teacher or professor, you can create a deck in MacFlash, then give your students just MacFlash Quizzer and the deck (or you can password protect the deck to prevent accidental changes).
