

This is just an example of what can be done with the music symbols provided in the accompanying file. I recommend using the file at 400% magnification. Both your document and the picture file. This way all the symbols can be placed precisely. I hope you like these symbols. Drop me a letter and tell me what you think.

These files are both FREEWARE. Use them as you wish. If you distribute them, however, be sure all files are included and unaltered. Thankyou.
