LURID LASSES 2.0

The multimedia program must have the following to run properly:

Windows 3.1 or greater.

Mouse

256 color VGA video card.

Color Monitor

486 50mhz or better microprocessor.

4 megs of memory or better.

4x CD-ROM drive.

The images are saved for use by any computer in the following manner:

256 color - BMP

24 bit true color - JPG

Both sets of images are in the directory /JPEG

If you have at least 170 megs free on your hard drive or JAZ cartridge, you might want to try loading the entire program to speed up the multimedia engine. To do so, simply copy the following files into the following directories. (Note x = drive letter that you have the additional space available)

LURID.CCA to x:\lurid\lurid.cca

LURID.EXE to x:\lurid\lurid.exe

LOGO.AVI to x:\lurid\logo.avi

\info*.rtf to x:\lurid\info*.rtf (* - means all files in directory)

\text*.rtf to x:\lurid\text*.rtf (* - means all files in directory)

To run the program, you may either double click on LURID.EXE or alter the

Thanks for purchasing Lurid Lasses.

PROGRAMMER'S NOTES:

In producing this multimedia presentation, certain problems were encountered. One was the crash of the system which put back the release date a full year. The second was that in preparing this product, it was obvious that the number of PC's running Windows 95 was greater than that running Windows 3.1. Therefore this presentation is best run on Win 95, and will have some problems with speed under Win 3.1. Please forgive!

If you have any problems or questions, please don't hesitate to write:
gunnison@adventurehouse.com. Please include the following information:

Processor
Ram size
CD-ROM speed
Video Card
Operating System
Problem occurring.

Once again, thanks for purchasing Lurid Lasses.
