December 14, 1993

Welcome!

This program updates CopyDoubler™ 2.0, 2.0.1 or 2.0.2 to version 2.0.3.

This program does not update CopyDoubler 1.0.x, CopyDoubler 2.0.x Lite, or any version of the CopyDoubler Demo. A separate updater called "CopyDoubler™ 2.0.3 Lite Updater" is available for CopyDoubler 1.0, CopyDoubler 1.0.1A, and CopyDoubler 2.0.x Lite. If the "CopyDoubler™ 2.0.3 Lite Updater" file cannot be found in the same location as this updater, contact Fifth Generation Systems (see below).

This program will automatically update the installed copy if it can be located.   To update a specific copy of CopyDoubler, hold down the Option key while clicking the "Update" button.   If you are updating the installed version (the default), you must restart your Macintosh after the updating process is finished for the changes to take effect.

CopyDoubler 2.0.3 Changes:

• Changed copyrights to reflect Symantec Corporation.

• Changed Balloon help references to AutoDoubler and AutoDoubler Smaller compression methods to reflect name change in DiskDoubler 4.0.

• PowerTalk enclosure files which are put in the Trash are now deleted properly. Note that when they are in the Trash, CopyDoubler will let the Finder handle the emptying of the Trash.

• Fixed a bug which would produce an "Out of Memory" error message when doing extremely large copies (generally greater than 1GB of files).

• Fixed a bug which would keep trying to shut down the Mac after every copy operation if a user-invoked Shutdown was previously canceled.

• Fixed a bug which would cause a crash when viewing the Scheduled Copy list the if the list contained any items other than disks or folders.

• Fixed a conflict with UnderWare™ when operating in 24-bit memory mode.

• Fixed a bug where a folder could sometimes be copied into one of it's subfolders, producing a never-ending copy.

• Fixed a bug where a folder could be "replaced" by a contained item.

How To Contact Fifth Generation Systems:

Fifth Generation Systems, Inc.
10049 N. Reiger Road
Baton Rouge, LA   70809
504-291-7221 (main)
800-873-4384 (sales)
800-766-7283 or 504-291-7283 (technical support)
504-295-3268 (fax)
BBS: (504) 295-3344   (300/1200/2400 baud, N, 8, 1)
          (504) 295-3261   (9600 baud, N, 8, 1)
