

How does BasicFacts Maker Work?

To make a worksheet, simply choose the operation you want to use from the **Main Menu** and a new math sheet will appear. Choose **Change Facts** from the BasicFacts menu to change the numbers in each of the equations. Choose **Print** from the **File** menu to print a teacher answer page and a student worksheet.

To scroll to the bottom of the page, you need only to move the pointer in the direction you want to scroll and the **scroll tool** will appear. Put the pointer inside the scroll tool and it will change into a hand icon. Move the hand up or down to scroll in that direction.
