• Keyware •

AutoMenus is shareware.   It is distributed in a "Demo" state.   It will only boot on your machine 15 times unless you register the software with me.   Every time you open the AutoMenus Control Panel on a non-registered copy, you will be presented with a shareware registration dialog.

To receive a key code which will unlock AutoMenus so it will load an unlimited amount of times, plus stop the annoying shareware registration dialog every time you open its Control Panel, send $10 to:

> Michael Conrad
> 955 Escalon Ave. #505
> Sunnyvale, CA   94086

If you send $13 (U.S.), I will send you a disk containing the latest version.

** International orders, add $2 extra for shipping. **

You may distribute AutoMenus freely as long as no profit is made from its distribution and it is in its demo state.   You may not make any changes to this help text, about window, or code.
