AgendaMaker 2.3

Author	Kurt Swasing	kswasing@aol.com
CD Location	Maclopedia:The Shareware:Applications:	
Internet URL	http://users.aol.com/kswasing/mypage.html	

AgendaMaker will help you collect, organize, and sort through all the information that makes your life particularly yours. The program integrates notebook, task, calendar, alarm, mail, messaging, and conferencing features into one seamless application.

Shareware $25

Eliza 6.0

Author	Tom Bender	tombb@aol.com
CD Location	Maclopedia:The Shareware:Applications:	
Internet URL	http://members.aol.com/tombb/Trans_Tex_Software	

Enjoy a rousing conversation with your Mac. Eliza will play the part of a psychologist, conducting an open-ended clinical interview. As the patient, you get opinions and advice on a wide range of subjects. Eliza has a large vocabulary and the ability to formulate a virtually unlimited number of responses.

Shareware $5

I Ching Connexion 2.3

Author	Ed van Zon	edvanzon@euronet.nl
CD Location	Maclopedia:The Shareware:Applications:	
Internet URL	/info-mac/app/	

The I Ching Connexion is an ever-changing but always consistently interlocking graphic representation of the way the 64 hexagrams of the I Ching interrelate. As such it is the key to widen and deepen the interpretation of the outcome of a divination. It features the translation James Legge made (published in 1882, England) of the Imperial Edition of the I (published in 1715, China). This alone makes the program useful for anyone interested in the I Ching. Besides that it adds two radical views to the ancient Book of Changes: the Connexion and the Mediator. It also features an I Ching clock, a presentation of the link between the I Ching and astrology. And it allows you to calculate your natal hexagram. The I Ching Connexion requires a Macintosh with System 7.0 or later, 32-bit Color Quickdraw and at least 256 colors or grays. It's optimised for both PowerPC and 680x0 Macs (FAT application).

Shareware $20

Personal Log 2.1.2

Author	Michael F. Kamprath	kamprat@leonardo.net
CD Location	Maclopedia:The Shareware:Applications:	
Internet URL	http://www.leonardo.net/kamprath/claireware.html	

Personal Log allows you to easily create and manage collection of notes in one, easy-to-use file. Notarize each note by electronically signing them with PowerTalk. It's perfect for logs, diaries, and electronic notebooks. Associate a subject, time, and keywords with each note. Search all notes in a file to find exactly what you need. Embed a wide range of objects (pictures, sounds, file aliases, etc.) into each note. Supports Quickdraw GX printing. Includes 68K and PowerPC versions. Also allows editing of text files with no 32K limit!

Shareware $25

ScrapIt Pro 5.12

Author	John V. Holder	jvholder@northcoast.com
CD Location	Maclopedia:The Shareware:Applications:
Internet URL	/info-mac/app/

ScrapIt Pro, is the editable, searchable multimedia scrapbook... and a mini-word processor to boot! Need a place to store, sort, display and search all of your text notes, sounds, GIF files, JPEG files, QuickDraw 3D files? ScrapIt Pro is the utility you've been looking for! Anything you can copy to the clipboard can be pasted and stored in a ScrapIt Pro file. Features full support of Apple's latest technology; Drag & Drop, QuickDraw 3D, Speech, and more!

Shareware $20

ShareDraw 2.01

Author	Peirce Software	info@peircesw.com
CD Location	Maclopedia:The Shareware:Applications:	
Internet URL	http://www.peircesw.com/	

ShareDraw is a full-featured drawing application for the Macintosh. It can be used to create high quality illustrations, drawing, and schematics. ShareDraw has many more features than can be described here. A few features of special note are its multi-copy effects, powerful gradients, graphics library support, color blends, text binding to any curve, a very handy live help system, project management, 24-bit color, rulers, grids, QuickDraw GX printing, and PICT or EPS file export.

Shareware $24.95

Style 1.4.1

Author	Marco Piovanelli	piovanel@kagi.com
CD Location	Maclopedia:The Shareware:Applications:
Internet URL	http://www.kagi.com/authors/piovanel/

Style is a styled text editor, i.e. an application that lets you create, edit and print styled text documents. In a styled text document each character can have its own font, size, style, and color. In Style you can even embed pictures and sounds within the text. Unlike other styled text editors, Style doesn't impose any hard limit on the size of your documents (no 32K barrier!), nor on the number of windows open at the same time. The only limit is available memory. Style is a memory-based editor (i.e. it keeps all the text in RAM), but it automatically takes advantage of the available system memory when possible, so there's no need to adjust its partition size to edit large documents.

Shareware $10

Tester 4.21

Author	John Lindal	jafl@alice.wonderland.caltech.edu
CD Location	Maclopedia:The Shareware:Applications:	
Internet URL	/info-mac/app/	

Tester is a complete test editor. Type in the questions, add pictures where necessary, then print multiple copies of the test, with each copy having a different question ordering, and with an answer key for each copy. You can also practice taking tests. Teachers can record statistics on computer practice sessions and use this to analyze class performance and fine tune their tests. This is a demo version that lets you practice any test but only lets you create tests up to 10 questions long.

Shareware $10

Tex-Edit Plus 1.7.1

Author	Tom Bender	tombb@aol.com
CD Location	Maclopedia:The Shareware:Applications:	
Internet URL	http://members.aol.com/tombb/Trans_Tex_Software	

Tex-Edit Plus is a multi-window, styled text editor that fills the gap between Apple's bare-bones SimpleText and a full-featured word processor. It is particularly useful for formatting text that is transmitted to and from a BBS. Tex-Edit Plus is small, fast, easy-to-use and requires little memory.

Shareware $10

TGP II 1.41

Author	John Lindal	jafl@alice.wonderland.caltech.edu
CD Location	Maclopedia:The Shareware:Applications:	
Internet URL	/info-mac/app/	

Teacher's Grading Program helps you manage your student's grades quickly and easily. Everything is organized into 3 simple worksheets. Point, click, and type! Unlimited number of students & assignments per class. Choose from 4 methods of computing final grades! 8 different printouts including Home Notices! This is a demo version that allows you to enter up to 5 assignments.

Shareware $25

TimeSlice 1.2.1

Author	Maui Software	mauisw@aloha.net
CD Location	Maclopedia:The Shareware:Applications:	
Internet URL	http://aloha.net/~mauisw/	

TimeSlice is useful for consultants, programmers, attorneys, graphic designers, or anyone who bills for time, or just wants a simple solution for keeping track of time events. If you've used the TimeTracker product, you'll love TimeSlice. TimeSlice can be thought of as a TimeTracker Pro (or TimeTracker can be thought of as a TimeSlice Lite).

Shareware $25

TimeTracker 2.8

Author	Maui Software	mauisw@aloha.net
CD Location	Maclopedia:The Shareware:Applications:	
Internet URL	http://aloha.net/~mauisw/	

Do you work or charge by the hour? If so, then you need TimeTracker. TimeTracker is a simple time-tracking application for recording time tasks on the Mac. It is useful for consultants, programmers, attorneys, graphic designers, or anyone who bills for time, or just wants a simple solution for keeping track of time events.

Shareware $25

Word Translator 1.7

Author	Halldor Gislason	halldorg@centrum.is
CD Location	Maclopedia:The Shareware:Applications:	
Internet URL	/info-mac/app/	

Word Translator is a translation program. This shareware version includes several sample dictionaries, including Spanish, Portuguese, French, Italian and German but more languages are available. You can use Word Translator to translate words and phrases from one language to another. It is easy to change dictinaries as well as add your own translations and words.

Shareware

Apprentice Info

Author	Celestin Company, Inc.	celestin@celestin.com
CD Location	Maclopedia:The Shareware:Development:	
Internet URL	http://www.celestin.com/	

Apprentice is the definitive CD-ROM collection of Mac source code and utilities. You'll find tons of example code, as well as the latest and greatest programming tools and utilities. Updated twice yearly, Apprentice is one of the nicest programmer resources around. This document describes Apprentice, the Apprentice web site, and includes a special offer for ordering Apprentice directly from Celestin Company.

BBEdit Lite 3.5.1

Author	Bare Bones Software	support@barebones.com
CD Location	Maclopedia:The Shareware:Development:	
Internet URL	http://www.barebones.com/	

BBEdit Lite is a freeware derivative of BBEdit. It includes QuickStart document which describes many of the application's features. Full documentation, as well as a considerable amount of additional functionality, is available with the purchase of BBEdit 4.0.

Freeware

Chipmunk Basic 3.3.7

Author	Ron Nicholson	rhn@nicholson.com
CD Location	Maclopedia:The Shareware:Development:	
Internet URL	http://www.rahul.net/rhn/cbas.page.html	

Chipmunk Basic is a simple Basic interpreter, accelerated for PowerMacs. It is similar to the line number interpreters of circa 1980. Its roots are from a Pascal program, basic.p, that was part of the test input suite to p2c, a pascal to c translator.

Freeware

DragInstall 2.0

Author	Ray Sauers	draginstall@sauers.com
CD Location	Maclopedia:The Shareware:Development:	
Internet URL	http://www.sauers.com/	

DragInstall is an installer that is as easy as dragging files and folders from one place to another. This trial version creates installers that will last for only one day. Contact the publisher for licensing information.

Gooey 1.2

Author George Cossey

CD Location Maclopedia:The Shareware:Development:

Internet URL /info-mac/dev/

Gooey is a graphical user interface building application. Use it to build frameworks for your applications. Comes with both a 68K and PPC version. The package is not public domain, however it is free for your use and may be freely distributed. It is still copyrighted and may not be sold. All the source code and resources generated from this program belong to the user.

Freeware

HoW Developer's Kit 1.3

Author	Ross Brown	AWOLSP@aol.com
CD Location	Maclopedia:The Shareware:Development:	
Internet URL	/info-mac/dev/	

Help on Wheels developer's kit (now supporting Metrowerks CodeWarrior as well as the MPW environment, and PowerPC as well as 68K programs) includes a sample application, and everything a developer would need to add help service to an application, control panel, or extension. The client interface is designed to take the burden of display, printing, saving, and other common help functions away from the developer.

Freeware

MacPerl 5.0.3

Author	Matthias Neeracher	neeri@iis.ee.ethz.ch
CD Location	Maclopedia:The Shareware:Development:	
Internet URL	http://www.iis.ee.ethz.ch/~neeri/	

MacPerl is a Macintosh port of Perl, a language that combines some of the features of C, sed, awk and shell. Both a standalone application and MPW tool are included. The standalone application requires System 7, but "MacPerl Runtime" provides a decent subset of the functionality under System 6. Some of the really cool features require ToolServer, System 7, and enough RAM. Includes complete C source code for building the application and tool under MPW.

Freeware

PopupFuncs 2.7

Author	Bare Bones Software	support@barebones.com
CD Location	Maclopedia:The Shareware:Development:	
Internet URL	http://www.barebones.com/	

PopUpFuncs is a productivity tool for developers. When invoked by clicking on a control in a source code window's title bar, it creates a popup menu of every function contained in a source code file, allowing you to see instantly the contents of an unfamiliar file. If a name is selected from the menu, the file is instantly scrolled to the beginning of that function. PopUpFuncs works with CodeWarrior, MPW, THINK C/Symantec C++, SADE, BBEdit, and QUED/M, and parses C, C++, Pascal, Object Pascal, assembler, Rez, and Fortran source files.

Freeware

PowerLisp 1.2

Author	Roger Corman	rgcorman@crl.com
CD Location	Maclopedia:The Shareware:Development:	
Internet URL	http://www.crl.com/~rgcorman/	

PowerLisp 1.2 is the public release of PowerLisp, a Common Lisp development environment for the Macintosh. It consists of a Common Lisp interpreter, native-code 680x0 compiler, 680x0 macro assembler, disassembler, incremental linker and multi-window text editor. It requires a Macintosh with at least a 68020 processor and system 7.0 or later. About 2.5 megabytes of RAM are required to run it, and to do much with it you need more like 5 or 6 megabytes. Like any Common Lisp system, the more memory the better. New to PowerLisp 1.2 is full native mode support on PowerMacs. A PowerPC compiler, assembler and disassembler are included along with a fat binary which runs on either a PowerMac or 68k Mac. PowerLisp is extremely fast. All compiled PowerLisp functions execute as native machine instructions. The speed is comparable to other fully compiled languages.

Shareware $50

ProFont 2.0

Author	Steve Gilardi	squeegee@mindport.net
CD Location	Maclopedia:The Shareware:Development:	
Internet URL	/info-mac/dev/	

ProFont is a version of Monaco 9 which includes slashed zeros, seriffed ells, etc. It is a good font for programmers. This release fixes a problem with printing the installation instructions. New since the 1.0.3 release are outline versions of ProFont (TrueType and Type 1). Installation instructions are included for System 7.x.x (including 7.5.1) on 68K and Power Macs. ProFont needs an installer! If you can help, please read the enclosed "ProFont info" file.

Smaller Installer 1.1.1

Author	Bill Goodman	goodman@cyclos.com
CD Location	Maclopedia:The Shareware:Development:	
Internet URL	http://www.cyclos.com/	

This is an installer with built-in compression. To create your own installer, you will also need a copy of Compact Pro®. In addition, you may require a resource editor such as ResEdit™ or Resorcerer®.

Tools Plus 3.0

Author	Water's Edge Software	WaterEdgSW@aol.com
CD Location	Maclopedia:The Shareware:Development:	
Internet URL	/info-mac/dev/	

Tools Plus is a set of powerful, yet easy-to-learn productivity libraries for Mac programmers using THINK C and THINK Pascal. It includes over 170 high-powered "set and forget" routines.

Shareware from $99 up

Apeiron 1.0.2

Author	Ambrosia Software	help@ambrosiasw.com
CD Location	Maclopedia:The Shareware:Games:	
Internet URL	http://www.ambrosiasw.com/	

Apeiron combines classic arcade action with state of the art computer animation & digital sound. Your ethereal energy is trapped within a crystal shard. The mushroom patch residents sense your presence & hunt your crystal. With plasma cannon blazing, you must hold out. Professionally rendered sprites, digital audio effects & non stop action all make Apeiron a game to be reckoned with.

Shareware $15

Barrack 1.0.1

Author	Ambrosia Software	help@ambrosiasw.com
CD Location	Maclopedia:The Shareware:Games:	
Internet URL	http://www.ambrosiasw.com/	

Barrack exhibits a precarious balance between action and strategy; thinking and reflex. The feeling you get from playing Barrack is an eccentric harmony between the automatic, mind-numbing pleasure of Tetris and the kind of action found in Maelstrom. The result is that you'll be left with sweat on your brow. Barrack features stunning artwork, intense action, vibrant 8-channel stereo sound effects, and the addictiveness that comes standard in an Ambrosia game.

Shareware $15

Blackjack Deluxe 2.1.5

Author	Circumflex Software	paulmorphy@aol.com
CD Location	Maclopedia:The Shareware:Games:	
Internet URL	/info-mac/game/crd/	

Blackjack Deluxe has been described as the best Blackjack casino package on ANY computer platform. It runs on almost every Macintosh with System 7 or later. It requires 32 bit addressing to be on (meaning certain machines like the original Mac, Mac 512K, Mac 512ke, Mac Plus, Mac SE etc. can't run it because they can only address 24 bits due to a problem in the Macintosh ROM.) Blackjack also requires 1600K of RAM to be free, and it takes up 2MB of hard drive space. The 120 page color manual that comes with Blackjack Deluxe takes up 2.6 MB of space. This is a self running application; you will NOT need a word processor to read the manual.

Shareware $20

Chiral 1.0.4

Author	Ambrosia Software	help@ambrosiasw.com
CD Location	Maclopedia:The Shareware:Games:	
Internet URL	http://www.ambrosiasw.com/	

Chiral is a fusion between the scientific concept of atomic bonding and the addictive game play of Tetris. Players are challenged to form bonds between atoms to create inert molecules before the atoms overflow from a vial. Points are scored by the complexity of the molecular pattern and the speed with which it is assembled. A doctorate in atomic chemistry is not needed; an interactive tutorial, Chiral Basics, is included with the package.

Shareware $15

Escape Velocity 1.0.0

Author	Ambrosia Software	help@ambrosiasw.com
CD Location	Maclopedia:The Shareware:Games:	
Internet URL	http://www.ambrosiasw.com/	

Escape Velocity spans a number of genres, combining elements of classic "trading" games, arcade space shoot-outs, and strategy simulations. Whether you choose to build a trading empire, aid the Rebellion in a civil war, or strike out on your own as a ruthless pirate, Escape Velocity provides a multitude of options for the game connoisseur. This open-ended gameplay allows each player to chart their own course as they play; there's no "right" way to play Escape Velocity, as long as you have fun!

Shareware $20

Factory 1.2

Author	Patrick Calahan
	pcal@agora.rdrop.com
CD Location	Maclopedia:The Shareware:Games:
Internet URL	/info-mac/game/arc/

Factory is the industrial devolution game. It takes you to a not so distant future in which automated manufacturing systems have failed and it's up to you to keep the factories running. You must direct various components along conveyor belts and through pipes by clicking on control switches. Properly combine the components into finished products and meet your quota or you're fired! The registered version of Factory includes an editor so that users can create and share their own custom factories and products.

Shareware $15

Giza 2.0.0

Author	B&B Software	bobmanc@aol.com
CD Location	Maclopedia:The Shareware:Games:	
Internet URL	http://www.bluefin.net/~bobmanc/	

Giza is a 3D, first person perspective, fully texture mapped adventure game for the Mac. You are a scientist who has discovered that the great pyramids of Egypt will soon be destroyed. The secrets that can save them lie within the pyramids themselves. You must try to collect all the information you need without getting yourself killed. Giza is full of secrets, gold and dangers. There are tricks, traps and evil inhabitants in the pyramid that will try to stop you. There is also a special ring, transporters, secret passageways and magic potions that can help you. 25 levels of mystery and adventure. Giza also comes with an editor that lets you create your own pyramid levels! Challenge your friends with levels you created or upload them for others to try. The editor is so easy to use that anyone can create great levels in minutes.

Shareware $15

GopherGolf 3.0.6

Author	B&B Software	bobmanc@aol.com
CD Location	Maclopedia:The Shareware:Games:	
Internet URL	http://www.bluefin.net/~bobmanc/	

GopherGolf is the miniature golf game for Macintosh. It's great fun for all ages. Now you and your family can enjoy the fun of putting through castles, windmills, pipes and water in the comfort of your own home. Watch out for that pesky gopher, You never know where he will pop up next. Play the courses included in this package or create your own courses with the built-in editor. You can also play courses created by other registered users.

Shareware $15

KeyWack 2.0

Author	Paul Duffy	epware@world.std.com
CD Location	Maclopedia:The Shareware:Games:	
Internet URL	/info-mac/edu/yng/	

KeyWack is a game for babies who like to sit at their parent's Mac and bang the keyboard. KeyWack prevents babies from accidentally opening most programs or documents, and makes banging even more fun by drawing shapes and playing random sounds as the keys are whacked. This program works with any Mac (with System 6.0.2 or higher) but looks best on one with color.

Shareware $10

Maelstrom 1.4.3

Author	Ambrosia Software	help@ambrosiasw.com
CD Location	Maclopedia:The Shareware:Games:	
Internet URL	http://www.ambrosiasw.com/	

This Macintosh classic is what put Ambrosia on the map as the leading Macintosh shareware publisher. With detailed color animation, four channels of digital sound, and smooth game play, Maelstrom takes full advantage of the Macintosh's multi-media capabilities. All the game needs is someone with guts and a thirst for glory in the pilot's seat.

Shareware $15

Swoop 1.0.2

Author	Ambrosia Software	help@ambrosiasw.com
CD Location	Maclopedia:The Shareware:Games:	
Internet URL	http://www.ambrosiasw.com/	

Developed by David Wareing, of Adelaide, Australia, Swoop is an arcade classic combining pulse-quickening game play with state of the art computer animation and audio effects. Smooth flowing action, detailed full color graphics, and custom sound effects all provide for exciting game play. The only thing missing is the cash box in which to pump your coins.

Shareware $15

Ultima III 1.3

Author	Leon McNeill	beastie@lairware.com
CD Location	Maclopedia:The Shareware:Games:	
Internet URL	http://www.swcp.com/~beastie/	

Ultima is one of the primary games that formed the basis of what a computer role-playing game should be. Some would argue that Ultima should be called an adventure game. With each Ultima, the bar was raised for the role-playing standard. Ultima I and II are loads of fun, but Ultima III was the first to be truly addictive. It doesn't have real-time texture-mapped 3D perspective views or network play, but it has fantastic gameplay.

Shareware $25

DNS Lookup 0.9.2

Author	Paul Herman	a540pau@pic.ucla.edu
CD Location	Maclopedia:The Shareware:Network:	
Internet URL	ftp://ftp.pslc.ucla.edu/pub/paul/	

DNS Lookup is a semi-port of nslookup for UN*X. If you want to translate an IP address into a domain name, or vice versa, this is the utility for you.

Freeware

EasyServe 0.2

Author	Jason Linhart	jason@crocker.com
CD Location	Maclopedia:The Shareware:Network:	
Internet URL	http://Summary.Net/soft/easyserve.html	

EasyServe is an extremely simple World Wide Web server. It serves pages to the WWW. That is all it does. There´s no logging, no CGI, no administration of any kind. Simply run EasyServe. You might want to put an alias to EasyServe in your startup items folder. Then any file in the docs folder is served to the WWW. Look in the EasyServe window to find the URL (location) where your documents are served. EasyServe REQUIRES OpenTransport 1.1. It´s a fat binary for both 68K Macs and PPC Macs.

Freeware

File eXpress 1.1

Author	Walter Pelsch	ruskin@applelink.apple.com
CD Location	Maclopedia:The Shareware:Network:
Internet URL	/info-mac/comm/

File eXpress allows you to send any file on your Mac to any other machine running File eXpress just by "dropping" the item to send on the FX•Packager's mailbox icon in the Finder. File eXpress also creates a single "FX•InBox" folder on your desktop where you'll be able to quickly access items sent to you by other File eXpress users. File eXpress will even deliver your files over AppleTalk and TCP/IP at the same time! So you'll be able to use a single tool and the same user interface to send files to other File eXpress users regardless of which network protocol they use. And, as File eXpress was built from the ground up to be completely asynchronous, you'll be able to continue with your work while File eXpress sends and receives your packages in the background. No more waiting for your Macintosh to "release" the Finder when you transfer your files or folders across the network.

Shareware $25

Internet Config 1.2

Author	Quinn "The Eskimo"	quinn@quinn.echidna.id.au
CD Location	Maclopedia:The Shareware:Network:	
Internet URL	http://coos.dartmouth.edu/~emk/ic/index.html	

Internet Config is a Macintosh application and extension that permit applications to share the same preferences. This means that you no longer need to tell quite as many programs what your email address is, the name of the organization with which you are affiliated, or what program you prefer to use to read netnews. Many Internet applications are Internet Config-aware, such as Newswatcher, Fetch, Anarchie, etc.

Public Domain

Menu Grabber 1.3

Author	Ross Brown	AWOLSP@aol.com
CD Location	Maclopedia:The Shareware:Network:	
Internet URL	/info-mac/gui/	

Menu Grabber is a fascinating illustration of the power of Menu Events, Menu Grabber lets you pick an application from any Macintosh on the network, and presents an identical copy of its menu bar on your screen (but in bright red and white-on-black, just so you realize what you might be getting into). While grabbing an application, you can pull down a menu or use a keyboard equivalent to simulate the same action on the target application. This application can be useful in network management, and to people like me who sometimes forget to close a needed document before leaving the office.

Freeware

PPPop 1.4.1

Author	Rob Friefeld	friefeld@deltanet.com
CD Location	Maclopedia:The Shareware:Network:	
Internet URL	/info-mac/comm/inet/conn/	

PPPop is a MacPPP 2.0.1 operator application. It puts up a little window containing a button. Clicking on the button opens or closes a PPP link. An arrow on the button shows the current state of PPP: up or down.

Shareware $10

rnMac 2.0d2

Author	Roy Wood	rrwood@io.org
CD Location	Maclopedia:The Shareware:Network:	
Internet URL	http://www.io.org/~rrwood/	

rnMac is a offline newsreader/mailer for Macintosh computers. If you don't know what Usenet news is, you probably don't have much need for this program. Contrary to what the name implies, this is not a port of "rn" or any similarly-named newsreader. rnMac knows how to interact with NNTP servers in addition to its ability to work with a uucp-based feed (such as one involving UUPC and ToadNews). To use rnMac in an NNTP context, you will, of course, have to have MacTCP or Open Transport installed and configured correctly on your Mac.

Shareware $25

TalkShow 1.0b

Author	Show&Tell Software	mai@nando.net
CD Location	Maclopedia:The Shareware:Network:	
Internet URL	/info-mac/comm/	

TalkShow is a networking program that allows 2 users to communicate graphically, pictorially, and with spoken text, using Apple's text-to-speech technology. It is basically an enhanced white-board application. It works well over widely available network speeds (14.4kb or higher and AppleTalk).

Freeware

XTimer 1.9.2

Author	Eric Long	72764.1072@compuserve.com
CD Location	Maclopedia:The Shareware:Network:	
Internet URL	http://members.aol.com/XTimer4Mac/	

XTimer is a timer for tracking and logging time-based charges. The idea to create XTimer... began with a desire to keep track of expenses while using extended service areas of CompuServe. Later, the idea was expanded to include users of different online services, such as America Online and Prodigy, and also PPP users on the Internet. CompuServe has since dropped the extended/basic services format and adopted a format similar to America Online.

Shareware $15

A PowerBook Suite 1.0

Author	Randall Voth	hvoth@cln.etc.bc.ca
CD Location	Maclopedia:The Shareware:System:	
Internet URL	/info-mac/cfg/	

A PowerBook Suite is a shareware set of PowerBook utilities consisting of: a new backlight dimmer that can invert your PowerBook's screen and fade any attached color monitors; keyboard control of backlight and contrast; a new user-configurable menu clock that adds an analog/digital clock, date, elapsed timer, estimated battery remaining and complete battery status; the menu clock can be dragged anywhere in your menubar (shift-drag); control-click sleeps your PowerBook; command-click spins down your hard drive; option-click resets the elapsed timer; keyboard switching between applications; a new system menu that allows easy toggling of Appletalk, Filesharing and color depth. You can also turn off an Express Modem.

Shareware $10

Aaron 1.3.2

Author	Gregory D. Landweber	greg@math.harvard.edu
CD Location	Maclopedia:The Shareware:System:	
Internet URL	http://greg.math.harvard.edu/	

Why wait for eight? Your Mac can have the Copland user experience today! Just drop Aaron into your Extensions folder, and your Mac will look just like the Copland Default Theme will (Aaron is based on Apple's official Copland interface specs). Aaron gives you 3D Copland-style windows, scroll bars, buttons, folder icons, menus, fonts, pop-ups, progress boxes, Finder window headers, and more. Aaron is a fat binary for Macs and PowerMacs.

Shareware $10

AppSizer 2.21

Author	Peirce Software	info@peircesw.com
CD Location	Maclopedia:The Shareware:System:	
Internet URL	http://www.peircesw.com/	

AppSizer is a control panel (cdev) that allows you to modify an application's MultiFinder memory partition size as you launch it. To do this, you just hold down the control key as you launch the application and AppSizer brings up a dialog that lets you specify the application's partition size. You use the control panel interface to set which key you want to be the magic key that brings up the AppSizer dialog. You also use the control panel interface to register your copy of AppSizer and toBL read the help messages that tell you more about AppSizer.

Shareware $19.95

BeHierarchic 3.0.3

Author	Fabien Octave	100020.1501@compuserve.com
CD Location	Maclopedia:The Shareware:System:	
Internet URL	/info-mac/gui/	

BeHierarchic is one of the first AppleMenu enhancers. After installing BeHierarchic, when you click in the Apple, it lets you display submenus for each folder, folder alias or server alias located into your Apple Menu Folder. BeHierarchic will work on any Macintosh model from a Mac Plus up to the latest PowerMacintosh with system 7.0 to and including 7.5.3. BeHierarchic will display more than five level of sub menus. It allows you to change the font and size used to display the Apple Menu. It can display small icons in the submenus, and much more.

Shareware $10

Chuck's Printer Driver 1.4.0

Author	Charles Rentmeesters	chuck@msn.fullfeed.com
CD Location	Maclopedia:The Shareware:System:	
Internet URL	/info-mac/prn/	

Chuck's Printer Driver is a printer driver / chooser device for using Epson compatible dot-matrix and HP Laser Jet compatible printers with your Macintosh computer. (Not to mention the hundreds of printers out there that are compatible with the above printers, or Panasonic printers.) It has been tested on a Macintosh Powerbook 180c (system 7.1, and system 7.5), with a Panasonic KX-P1080i printer, a IBM Color Jetprinter, and a HP Color DeskJet 540.

Freeware

Clipfolio 1.5

Author	SingleTrac Software	singltrc@dimensional.com
CD Location	Maclopedia:The Shareware:System:	
Internet URL	/info-mac/gui/	

Clipfolio watches your work and every time you cut or copy information to the clipboard, Clipfolio copies that information. Your information is saved and you can come back later to use it over and over while you continue copying new stuff (which is also being saved). Clipfolio will save up to 20 of your most recent cuts or copies. Automatically! When you want to access something that Clipfolio has saved, simply bring up Clipfolio's window and select the desired item. It will be put back on the clipboard in its original form!

Shareware $20

Décor 3.0.1

Author	Francois Pottier	Francois.Pottier@ens.fr
CD Location	Maclopedia:The Shareware:System:	
Internet URL	http://www.eleves.ens.fr:8080/home/pottier/	

Décor is an incredibly cool System extension which allows you to replace the boring desktop pattern with a background picture of your choice. Décor handles StartupScreen, PICT, GIF and JPEG files. It has a lot of great features; for instance, you can ask it to select pictures from a certain folder, and to pick a new one every 10 minutes. It is also accelerated for PowerPCs.

Shareware $10

DeskPicture 4.02

Author	Peirce Software	info@peircesw.com
CD Location	Maclopedia:The Shareware:System:	
Internet URL	http://www.peircesw.com/	

DeskPicture is a handy utility that makes it easy for you to display pictures on your desktop and manipulate them to your taste. Once you've placed one or more pictures on your desktop, DeskPicture provides many options for adjusting their appearance. In general, DeskPicture offers many of the same functions for moving pictures and changing their size as drawing applications, so if you've ever used that type of application, you should have no problems working with DeskPicture.

Shareware $19.95

Disk Wizard 2.0

Author	Francois Pottier	Francois.Pottier@ens.fr
CD Location	Maclopedia:The Shareware:System:	
Internet URL	http://www.eleves.ens.fr:8080/home/pottier/	

Disk Wizard is a disk cataloguing program. But unlike other such utilities, it does not require you to scan disks after changing their contents; instead, they're scanned automatically when you eject them. This means that Disk Wizard always knows which file is where, without bothering you in any way. It allows fast searching and searching for duplicates, expanding StuffIt archives on the fly, dragging files from it to the Finder, etc. Disk Wizard supports floppies, CDs, SyQuests, hard disks, whatever. And it is accelerated for PowerPCs.

Shareware $10

eDOC 1.1.2

Author	Michel Touchot	100023.1256@compuserve.com
CD Location	Maclopedia:The Shareware:System:	
Internet URL	/info-mac/app/	

This is a very cool and extremely efficient way of creating electronic documents, similar to Acrobat Reader files. However, with eDOC, you can create standalone documents which don't require a reader. Although it does not have such features as bookmarks, it is still a very nice and inexpensive method of distributing information.

Shareware $25

Font-o-rama! 1.0.1

Author	Aaron Starr	starra@peak.org
CD Location	Maclopedia:The Shareware:System:	
Internet URL	/info-mac/font/util/	

Font-o-rama! is a font dialog box. It is a drop-in replacement for the font dialog box or font menus in all the applications you use. With Font-o-rama! you can see all the fonts on your system at once! It's better than other font dialog boxes, because it's carefully designed to be very quick and easy to use. It's better than font menus for the same reason. If you like using the keyboard, you can quickly select and set fonts using only the keyboard. If you like the mouse, you can set any font, size, or style with a single click.

Shareware $10

ForceQuit 1.0b

Author	Jerome Genest	jgenest@phy.ulaval.ca
CD Location	Maclopedia:The Shareware:System:	
Internet URL	/info-mac/cfg/	

ForceQuit is an extension and application combination that adds some features to the conventional "ForceQuit" (option-cmd-esc) option available on the Mac since System 7. It is now possible to avoid the usual dialog box for the applications you've selected, and it will also prevent you from inadvertently quitting a process. You can also protect your computer against intruders.

Shareware $5

Godot's Faces 1.08

Author	Gregory Lemperle-Kerr	ASTARTE@applelink.apple.com
CD Location	Maclopedia:The Shareware:System:	
Internet URL	/info-mac/cfg/	

If you want to use an icon set as a replacement for the ones that come standard with the System, and you don't want to do dangerous ResEdit work to install them, Godot's Faces will help. You can also use it to keep sounds and other System-related items (FKeys, etc.) out of the System file.

Freeware

Greg's Buttons 3.7.6

Author	Gregory D. Landweber	greg@math.harvard.edu
CD Location	Maclopedia:The Shareware:System:	
Internet URL	http://greg.math.harvard.edu/	

Have you ever wondered why System 7's windows and scroll bars are 3D and shaded while the push buttons are still flat and black and white? Are your eyes tired of staring at bright white window backgrounds? Does that blocky Chicago font get you down? Or maybe you just yearn for a red stop sign. If so, you should try Greg's Buttons, a control panel that lets you customize your Mac's user interface. Once you use it, you will never be able to go back.

Shareware $15

Greg's Hack 1.0

Author	Gregory D. Landweber	greg@math.harvard.edu
CD Location	Maclopedia:The Shareware:System:	
Internet URL	http://greg.math.harvard.edu/	

Greg's Hack is a tiny extension that anti-aliases most of the text on your Mac's screen. In other words, it uses shades of gray to blur the jagged edges of bitmap fonts. Anti-aliasing makes tiny text legible and large text smoother. This process requires either PostScript or TrueType fonts and a monitor capable of displaying at least 16 grays. It looks best at high screen resolutions, and since anti-aliasing is processor intensive, a Power Mac is recommended.

Freeware

MasterFKey 1.0

Author	Peter Hoerster	hoerste@uni-muenster.de
CD Location	Maclopedia:The Shareware:System:
Internet URL	/info-mac/cfg/

Have you ever found yourself needing more than ten FKeys at your fingertips or forgotten which command-shift-key goes with a specific FKey? Have you ever reinstalled your System and lost all of your FKeys? Have you ever had the wish to see all of your FKeys in a list to select one by mouse? Have you ever slowed down your machine with a bunch of rarely needed extensions? Have you ever been afraid to spend memory for a system extension which does only simple things which could also been done by an FKey? All of this problems are solved by MasterFKey, the ultimate FKey utility to manage all your FKeys as easy as possible!

Shareware $10

Menu Bar Pattern 1.3.1

Author	Sonflower Softworks	SonflowrSw@aol.com
CD Location	Maclopedia:The Shareware:System:	
Internet URL	/info-mac/gui/	

Menu Bar Pattern will convert your plain menu bar into a piece of eye candy. You can have just about any pattern displayed in the menu bar. Instead of just decorating your desktop, why not spruce up that menu bar of yours?

Shareware $7

Menu Events 1.3

Author	Ross Brown	AWOLSP@aol.com
CD Location	Maclopedia:The Shareware:System:	
Internet URL	/info-mac/gui/	

Menu Events is a system extension that bridges the gap between scripting applications and the vast number of non-scriptable applications. It makes most applications controllable through their menu commands, using program linking (Apple events). Any script, or any program equipped to send Menu events, can query and execute the menu commands of any compatible application on any Macintosh on the network. An AppleScript scripting addition ('osax') and sample script show you how to control an application through its menus. You can record Menu event commands directly into a script editor by pressing the Caps Lock key while selecting items from menus.

Freeware

Pict Pocket 1.3

Author	Ross Brown	AWOLSP@aol.com
CD Location	Maclopedia:The Shareware:System:	
Internet URL	/info-mac/gst/grf/	

Pict Pocket is a different kind of screen capture utility, great for people who need to build a lot of window pictures into their documents, but don't want to waste a lot of storage. Most of the pictures in AWOL Utilities help files were captured using PictPocket. PictPocket "picks the pocket" of applications as they draw their windows, not after they have been drawn. This difference allows it to place in the Clipboard a 'PICT' which represents the actual elements drawn, rather than a bitmap (raster) image. (You choose whether or not to include the window frame.) Not only is a PictPocket 'PICT' smaller than a bitmap 'PICT', and not proportional in size to the depth of color, but you retain the ability to edit the picture later, using an application such as Microsoft Word or PowerPoint. Change text, colors, position of elements, whatever! If you need a blow-up of the picture, just change the Page Setup scaling factor, and it will still print perfectly, with no bitmap "jaggies."

Freeware

PopupCD 1.3.1

Author	John Brochu	jbrochu@tiac.net
CD Location	Maclopedia:The Shareware:System:	
Internet URL	/info-mac/gst/snd/	

PopupCD is a unique and elegant solution to your CD audio control needs, allowing you to play your audio CDs in the background while you work. It is a popup remote control that installs as a control panel/extension, and remains totally hidden until you call it up with a click of the mouse button. The popup remote includes all conventional CD player functions, as well as a very functional LCD display and elapsed track/disc time bargraph, all rendered in a realistic 3D interface that makes playing your CDs a pleasure!

Shareware $15

Power Windows 1.0.2

Author	Gregory D. Landweber	greg@math.harvard.edu
CD Location	Maclopedia:The Shareware:System:	
Internet URL	http://greg.math.harvard.edu/	

Power Windows is a tiny extension that lets you drag the entire contents of windows instead of a dotted outline. Unlike other similar extensions, Power Windows uses backing store to preserve the contents of the screen as you drag, instead of turning your window into a giant eraser.

Shareware $5

Program Switcher 3.4.0

Author	Michael F. Kamprath	kamprat@leonardo.net
CD Location	Maclopedia:The Shareware:System:	
Internet URL	http://www.leonardo.net/kamprath/claireware.html	

Program Switcher is a simple control panel which allows you to quickly switch between running applications. You can control switching by a user settable key sequence. Program Switcher displays a small window during the switching process which helps you pick which application you would like to switch to. There is an option to automatically hide all background applications when switching to a new application and the ability to quit applications by "marking" them when switching with Program Switcher. Program Switcher is a FAT control panel.

Shareware $10

SCSI eject FKEY

Author	Sauro Speranza	speranza@cirfid.unibo.it
CD Location	Maclopedia:The Shareware:System:	
Internet URL	/info-mac/gui/	

SCSI eject will eject just about any media you can insert into your SCSI drives, from CD-ROMs to flopticals. It cannot eject SyQuest cartridges, since these require a manual switch.

Freeware

Sleeper 2.0.3

Author	Jon Gotow	gotow@stclairsw.com
CD Location	Maclopedia:The Shareware:System:	
Internet URL	http://www.stclairsw.com/stclairsw/	

Sleeper is a control panel for desktop Macintoshes and Power Macintoshes that dims the screen, powers down Energy Star compliant monitors, and spins down disk drives after periods of inactivity. In addition to working well on the desktop, Sleeper is well suited for unattended operations. For file servers, ftp and http hosts, and unattended telephony such as fax and BBS systems, Sleeper will wake the drives up when they are needed and put them to sleep when they are idle. Sleeper is easily configurable; it provides hotkey control for on-demand activation of its sleep features, and separate delay settings for screen dimming, monitor power down, and disk sleep.

Shareware $20

Smooth Windows 1.1

Author	Jonas Walldén	jonasw@lysator.liu.se
CD Location	Maclopedia:The Shareware:System:	
Internet URL	http://www.lysator.liu.se/~jonasw/shareware.html	

Smooth Windows (formerly called Smooth Move) is an extension which implements translucent window dragging. It is even possible to adjust the degree of translucency while you are moving a window. Version 1.1 adds support for 680x0 Macintoshes, and also has an improved control panel with more customizable keyboard shortcuts and Balloon Help.

Shareware $10

Snapz 1.0.0

Author	Ambrosia Software	help@ambrosiasw.com
CD Location	Maclopedia:The Shareware:System:	
Internet URL	http://www.ambrosiasw.com/	

Snapz is the big game hunter of screen capture programs: it'll capture the wild ones for you. No image is too fast, too tricky, or too large. Snapz captures them all: startup icons, pull down menus, games in the thick of the action, animation, video... not even your screen saver displays are safe. MacWeek says Snapz "...is the first screen-capture utility that can grab on-screen activities, such as the march of start-up icons and zooming rectangles." Macworld magazine calls Snapz the screen capture utility that "...can ride to your rescue."

Shareware $15

Super Save 1.1.3

Author	Michael F. Kamprath	kamprat@leonardo.net
CD Location	Maclopedia:The Shareware:System:	
Internet URL	http://www.leonardo.net/kamprath/claireware.html	

Super Save is an easy-to-use control panel which saves all the keystrokes you make to a convenient save file. It helps protect your data from accidental loss, an integral part of any overall data protection scheme. Super Save is active at all times or only when any application from an user-defined application list is the front program. A password bypass feature allows you to skip the recording of your sensitive information. Super Save is a FAT control panel.

Shareware $10

Symbionts 2.6.3

Author	Nivek Research	nivek@kagi.com
CD Location	Maclopedia:The Shareware:System:	
Internet URL	http://www.kagi.com/authors/nivek/	

Symbionts is an extension that monitors the startup process. Symbionts displays the name and number of bytes of memory each system extension allocates from the system heap. The name and number appear beneath the extension's icon, and since the name is usually truncated, Symbionts also displays it in the menu bar. Symbionts even shows the icons for those extensions that don't normally reveal themselves.

Shareware $20

UnModal Dialog 0.9.1

Author	Michael F. Kamprath	kamprat@leonardo.net
CD Location	Maclopedia:The Shareware:System:	
Internet URL	http://www.leonardo.net/kamprath/claireware.html	

UnModal Dialog is a system extension that converts most modal dialogs into movable modal dialogs. It is useful for switching out of applications that are conducting lengthy processing while a modal dialog is up. UnModal Dialog is a FAT system extension.

Shareware $5

ValueFax 2.0.8

Author	Pancomm	valuefax@netcom.com
CD Location	Maclopedia:The Shareware:System:	
Internet URL	ftp://ftp.netcom.com/pub/va/valuefax/	

ValueFax is a commercial quality, full function product with QuickFax, fax driver, full reception and conversion of the fax in background, installer, and an online manual. Versions of this product have been shipping commercially under different names for several years. The basic product has been thoroughly tested in a variety of Mac configurations using a variety of Class 1 and Class 2 modems (this product will not work with modems that support Class 2.0 only or with Apple's express modems or with Apple's Geoport modems).

Shareware $23

Virtual Desktop 1.9

Author	Ross Brown	AWOLSP@aol.com
CD Location	Maclopedia:The Shareware:System:	
Internet URL	/info-mac/gui/	

Virtual Desktop is the premier virtual desktop manager for the Macintosh that works on all types of Macs and all types of monitors. For 160K of memory, you can have a virtual desktop as big as you like, in full color. Excellent for PowerBooks and other Macs with the ability to run many programs at once, but nowhere to put the windows.

Freeware

WindowMenu 1.2

Author	Mark Aran Aiken	marka@ee.mcgill.ca
CD Location	Maclopedia:The Shareware:System:	
Internet URL	http://www.kagi.com/authors/marka/	

WindowMenu is a utility to allow you to work more efficiently with windows.

It allows you to bring a specific window to the front, even through it may be completely obscured by other open windows, by providing a popup menu of all open windows in an application. It also provides hotkeys for cycling forward and backward through all open windows.

Shareware $10

Balloon Popper .45

Author	Robert Schenk	bobs@saintjoe.edu
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/cfg/	

The normal way to get this little message is with Balloon Help. However, it seemed to me that presenting this message in a different form might be very useful in some cases. If I have 100 applications, I do not want to go through and point to each of them to see what it does. I would rather have a list of them with a description. And that is what Balloon Popper does. It goes through a folder or a drive (including CD drives), finds all the applications on it, and sees if they have a finder balloon. If one does, the program tries to read it. Then the name of the application and its description, if any, are put into a list which can be saved.

Freeware

CalcWorks 1.5.2

Author	John Brochu	jbrochu@tiac.net
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/sci/calc/	

CalcWorks is a very nice calculator implementation. Use it instead of the Apple supplied Calculator desk accessory. It includes numerous features such a scientific functions, RPN mode, etc. It is unique among computer-based applications in that it includes special calculation routines that avoid inaccuracies inherent in floating point math. A simple test for this problem is "1.0 - 0.9 - 0.1". Most calculators and spreadsheets generate an erroneous non-zero result to this a similar calculations. Not CalcWorks!

Shareware $20

Cheat II 3.0

Author	Adam Miller	miller@minerva.cis.yale.edu
CD Location	Maclopedia:The Shareware:Utilities:
Internet URL	/info-mac/game/

Cheat II is an application that lets gamers cheat ruthlessly in their games. Instead of a small collection of hacks or patches, Cheat II is a flexible app that enables users to cheat in virtually any game, in many different ways. Cheat's modular structure lets you design and save your own cheats, which can then be exported or imported, shared with your friends, or on the web page! You don't need to be a hacker to use Cheat: its easy-to-use interface makes it easy for everyone! Version 3 has all sorts of new features, including hot keys and improved shortcuts.

Shareware $5

Compact Pro 1.51

Author	Bill Goodman	goodman@cyclos.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://www.cyclos.com/	

Compact Pro is a file compression utility which lets you reduce the size of many of the files on your computer. Making files smaller can free up valuable space on your hard drive. It can also reduce the number of floppy disks needed to save backup copies of important files. If you transfer files between computers using modems, you can save time and money by first compressing the files since compressed files usually take significantly less time to transmit.

Shareware $25

DataConverter 1.3

Author	Brian Durand	bdurand@artic.edu
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/cmp/	

The purpose of this program is to provide a simple method for Macintosh users to convert the data from databases running on mainframes or other platforms into something that can be read in and used on their desktop machines.

Shareware $25

DictionaryEdit 1.3

Author	Simon Fraser	smfr@santafe.edu
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/cfg/	

DictionaryEdit is an application for editing the pronunciation dictionaries used by text-to-speech applications which use the Speech Manager. Dictionaries are used to substitute words in the text to be spoken with others, either to correct idiosyncrasies in pronunciation, for localization purposes, or just for fun.

Shareware $15

Disinfectant 3.6

Author	John Norstad	j-norstad@nwu.edu
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://charlotte.acns.nwu.edu/jln/	

Disinfectant is one of the nicest utilities around. It is a anti-virus program that prevents your computer from being infested by annoying virii. It will even install an INIT that will protect your computer when you insert a foreign floppy disk into your disk drive. And best of all, it's free.

Freeware

DiskSweeper 1.0

Author	James G. Speth	speth@end.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/disk/	

This simple utility will free up space on a floppy used by an excessively large Desktop file. Simply drop the offending floppy onto DiskSweeper, and in seconds it will be fixed. This is much faster and easier than reformatting the disk.

Shareware $1

DocJet 1.2.0

Author	Rocco Moliterno	rocco@mbox.vol.it
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/gui/	

DocJet is a utility for opening any file type, folders, disks, by means of an alternative application. With DocJet you can also link any given application to a key (and you choose the key...): when you drag a file, or folder, or disk, while holding down that key, your file is opened by the linked application. Last but not least, DocJet can directly open any file type, including cdevs, desk accessories, disks, folders, simply by typing a key. At last, you can remove all the aliases cluttering up your desktop and use DocJet instead.

Shareware $10

DoDelete 1.0.0

Author	Michael F. Kamprath	kamprat@leonardo.net
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://www.leonardo.net/kamprath/claireware.html	

DoDelete is a drag & drop utility for the secure deletion of files. It uses U.S. Department of Defense recommendations for permanently removing data from your hard drive. When files are delete with DoDelete, it is next to impossible for them to be recovered in any way. DoDelete is a FAT application.

Shareware $5

DropReception 2.2

Author	Yasushi Abu Kurosawa	kurosawa@wellmet.or.jp
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://www.wellmet.or.jp/~kurosawa/	

DropReception is an intelligent application launching utility. Instead of cluttering your desktop with aliases of drag and drop aware apps, just put a copy of DropReception there. It will learn the relationship of file type and applications. It also supports Internet Config.

Freeware

DropStuff w/EE 4.0

Author	Aladdin Systems	info@aladdinsys.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://www.aladdinsys.com/	

DropStuff with Expander Enhancer allows you to create plain or self-extracting StuffIt archives using a drag & drop interface. You can also create binhex files from your StuffIt archives. Adds PowerPC acceleration to StuffIt Expander!

Shareware $30

Easy Envelopes+ 2.6.0

Author	Ambrosia Software	help@ambrosiasw.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://www.ambrosiasw.com/	

Easy Envelopes is an electronic address book and envelope printer, that stores thousands of names, addresses, and phone numbers. Powerful editing options give your correspondence a clear, crisp, professional yet personalized look. With the built in word search function, Easy Envelopes doubles as an electronic phone book. After a simple one time set up, Easy Envelopes is ready to go. Easy Envelopes Plus embraces the Macintosh spirit: providing a simpler way to achieve better results.
Shareware $15

Eclipse 3.0.1

Author	Ambrosia Software	help@ambrosiasw.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://www.ambrosiasw.com/	

Eclipse is a screen saver. As an application, Eclipse offers the benefits of Extension-based screen savers, without the problems they can cause. Ambrosia's Eclipse needs only 90k of RAM, & 200K of HD space. Ambrosia's lean, mean, screen saving machine is the Swiss Army Knife of screen saver programs.

Shareware $15

epsConverter 1.4

Author	Art Age Software	ArtAge@aol.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://users.aol.com/ArtAge/ArtAge.html	

epsConverter is a utility that can read any portable EPS or PostScript file and convert it into an Adobe Illustrator file, suitable for editing with Adobe Illustrator, or with any application that can import Illustrator files. It preserves the vector EPS information, including high resolution curves, which allows for smooth scaling (zooming in and out), and a very high degree of editing with popular PostScript illustration packages, such as Adobe Illustrator and Macromedia FreeHand.

Shareware $24.95

EPStoPICT 1.1

Author	Art Age Software	ArtAge@aol.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://users.aol.com/ArtAge/ArtAge.html	

EPStoPICT is a utility that can read any portable EPS or PostScript file and convert it into a Macintosh PICT file, suitable for editing with a Macintosh drawing application, or for viewing with any application that supports standard PICT files.

Shareware $24.99

FilterTop 1.0 Promo

Author	TopSoft, Inc.	info@topsoft.org
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://www.topsoft.org/	

FilterTop is an application that allows Macintosh files to be processed through a series of "filtering" operations. These operations are provided via plug-in modules and are configured by the user via a graphical interface. This is the "promotional" version of FilterTop, a free product of TopSoft, Inc. This version is fully functional.

Freeware

FindText 1.3.1

Author	Patrick Maes	maes@macbel.be
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/text/	

FindText is a utility program that searches your files for specific text. It can search your 1000 Mb harddisk for that one file you're looking for containing a specific name, subject, date, word, ... You can select which kind of files you want to search. Eg. search only in files of type TEXT or only files created after 1-1-95 and not larger than 300 kb. Instead of manually opening all your documents and looking for a specific address let FindText do it for you (you probably will forget to open the document you are looking for because it is in a folder where it doesn't belong and you don't expect it to be there). It saves you a lot of time and boring work. FindText can work in the background.

Shareware $20

FlashWrite][1.1.O

Author	Ambrosia Software	help@ambrosiasw.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://www.ambrosiasw.com/	

FlashWrite][is a notepad utility. A notepad utility serves the same purpose as a paper scratch pad, sometimes you just want to jot something down. Equipped with many of the options found in full-blown word processors, FlashWrite's functionality better enables you to organize your thoughts. With FlashWrite's built in word search function, you're always able to find what you're looking for. FlashWrite also offers a full range of print and style choices.

Shareware $15

Gestalt.Appl 2.7

Author	Jean-Pierre Curcio	JPC83@calvacom.fr
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/cfg/	

The Gestalt Manager has been included with the Mac OS since System 6.0.4. It allows every application to know about the exact environment which it has been launched in. Dozens of topics are included for applications that use the Gestalt function defined in the Macintosh Toolbox API. The applications provide a "selector" as a parameter coded with exactly four characters and Gestalt returns information also coded as four bytes or an error code. The aim of Gestalt.Appl application is to show any user (not only developers) this information. Gestalt.Appl is a database of information published (or sometimes not published) by Apple and an interactive tool that allows you to ask the system and its extensions about features they implement.

Freeware

Greg's Browser 2.5.4

Author	Gregory D. Landweber	greg@math.harvard.edu
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://greg.math.harvard.edu/	

Do you think the Finder is too slow and clumsy when navigating through your folder structure? Do you perhaps use a hierarchical Apple menu utility but are tired of zigging and zagging your mouse from submenu to submenu? Or maybe you just like color icons. If so, then you should try Greg's Browser. Displaying multiple folders side-by-side in a single window, Greg's Browser lets you simultaneously see the contents of a folder, its parent, and a subfolder, providing a quick and easy way of moving both up and down through your folder hierarchy. Greg's Browser can browse into StuffIt and Compact Pro archives just like they were normal folders, and it uses Aladdin's StuffIt Engine for stuffing, binhexing, and expanding files. Greg's Browser also uses Macintosh Drag and Drop for inter-application dragging.

Help on Wheels 1.3

Author	Ross Brown	AWOLSP@aol.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/app/	

Help on Wheels is a generic help server, which springs from the help facility in the famous Disinfectant program, offers on-line, context-sensitive help service to all AWOL Utilities programs, and potentially others to come. As a user, you see help for several client programs stacked in a single window, with each program's menu commands and dialog items keyed to descriptive paragraphs in the help file. You can tell the help server to follow your actions in the background, so that you can read about the program while you use it. Hypertext links connect related sections and trigger demonstration actions by the client application.

Hover Bar 1.2.8

Author	Guy Fullerton	hedgeboy@pop3.kagi.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://www.deltanet.com/users/hedgeboy/	

HoverBar keeps icons and clipboard data at your fingertips by storing them on bars that float over everything, no matter what program you are using. It is by far one of the coolest and least expensive utilities in existence!

Shareware $5

HypnOptic 1.0.3

Author	Rocco Moliterno	rocco@mbox.vol.it
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/app/ss/	

HypnOptic is the mad, acid, savescreen application that will drive you crazy if you watch it carefully...

Postcardware

ISOnoHFS 2.0

Author	Sauro Speranza	speranza@cirfid.unibo.it
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/gui/	

ISOnoHFS is an application which will mount the ISO portion of a hybrid CD-ROM. If you have ever purchased a computer magazine that comes with a CD-ROM, and you want to see what's on the PC side of the disc, here's a utility that will reveal the contents to you.

Freeware

Jade 1.02

Author	Eric Shieh	eshieh@parker.eecs.berkeley.edu
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/gst/grf/	

Jade is a multithreaded JPEG viewer for the Mac which is relatively lean (388K as a fat binary, and a minimum memory partition size of 600K) but is extremely fast and sports some unique features. Multithreading gives you constant access to all of Jade's features: especially useful when used as a helper for a web browser or when you just want to decompress two images at once. Through the use of its own virtual memory scheme, Jade can have many (around 100+ files at the preferred partition setting) files simultaneously regardless of their size. This is because decompressed images only occupy a little RAM and the actual image is stored on disk. This feature allows you to do batch viewing jobs which are especially useful on slower machines: drop a ton of JPEGs on it and get a cup of coffee. When you return, voila! Jade can also display JPEG's at their full size or in a small (but quick!) preview size in addition to the standard screen size. This coupled with a delete file hot key allows users to sift and filter through many images with ease. Jade is also one of the first JPEG viewers to support Progressive JPEGs which are becoming prominent in web sites.

Freeware

JPEGView 3.3.1

Author	Aaron Giles	agiles@sirius.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://www.med.cornell.edu/~giles/aarong.html	

JPEGView is a (what else?) JPEG viewer. You can view, print, and crop pictures. It can also read other formats such as TIFF, PICT, GIF, etc.

Postcardware

List Cleaner™ 1.0

Author	SYNEX	synex@snx.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://www.snx.com/	

List Cleaner is a mailing list duplicate elimination utility. It reads address lists and eliminates duplicates by means of fuzzy logic. List Cleaner allows you to use any tab or return delimited text file created by your favorite word processor, spreadsheet or database. List Cleaner(tm) is not crippled, it is not a demo. When you register, you receive a serial number which makes available additional features (list capacity expands to 300,000 addresses).

Shareware $25

MacEnvelope™ Lite 1.0

Author	SYNEX	synex@snx.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://www.snx.com/	

MacEnvelope Lite allows you to create an address list with up to 1600 records, print to any Macintosh compatible printer and includes AVERY label templates, several popular envelope templates, the ability to print POSTNET and FIM bar codes, and design and save your own envelope and label templates.

Shareware $25

MacGzip 1.0

Author	SPDsoft	macspd@ivo.cps.unizar.es
CD Location	Maclopedia:The Shareware:Utilities:
Internet URL	/info-mac/cmp/

MacGzip is a gzip compressor (GNU zip) for the Macintosh. It requires system 7 or better, and it should work in any Macintosh if you have the correct combination of software and CPU (if you want to know which version of MacGzip you have, choose 'get info' from the finder; 68K and FAT run on any Macintosh (FAT runs native for Power Macs); and the version for Power Mac only runs on Power Macs). MacGzip works better if you have Internet Config installed; gzip is not an archiver, but a compressor. A compressor makes a compressed file for every plain file; an archiver will make a single compressed file from a set of files/directories.

GNU Public License

Maybe 1.5

Author	Ross Brown	AWOLSP@aol.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/gui/	

Maybe picks up where Finder left off in its implementation of aliases. Maybe converts a Finder alias file to give it an additional effect. Converted aliases do more than just point to the original item. They can: play a sound; open or print every item in the target folder; open some other item (document, application, folder, or whatever) first; send an Apple event to another program; make a startup item optional, by questioning the user, or checking the state of a key. Maybe doesn't solve your problems directly, but it gives you the power to do a lot of things you've been wanting to do.

Freeware

Pandora's Box 1.0

Author	Illume Software	ILLUMESoft@aol.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://members.aol.com/illumesoft/illume.html	

Pandora's Box is a game enhancement utility which lets you cheat at a number of games. It can locate and change game values (i.e. ammunition, health, lives, money, and other numerical values), find unknown game values (i.e. values that are displayed graphically instead of numerically, such as status bars, gauges, and indicators), and much more.

Shareware $25

PhoneWatcher 1.5

Author	Evan Olcott	eolcott@mail.triplo.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://www.triplo.com/triplo.html	

PhoneWatcher is a personal telephone manager for your Macintosh and modem. With PhoneWatcher, you can track when your phone rings, any caller ID info, and make the computer alert you with sounds and visuals when your phone rings. In order to use PhoneWatcher, you simply need an external modem. If you want to use the features available with caller ID, you need a modem capable of recognizing caller ID. PhoneWatcher has it's own built-in serial port arbitrators, and is compatible with most other software that wants to use the serial port (ZTerm, MacSLIP, FreePPP, etc.); PhoneWatcher only listens to the modem when no other application is using it.

Shareware $15

PowerScan 2.1

Author	Jonas Walldén
	jonasw@lysator.liu.se
CD Location	Maclopedia:The Shareware:Utilities:
Internet URL	http://www.lysator.liu.se/~jonasw/shareware.html

PowerScan is a disk scanning utility that lets you list the contents of any disk or folder, filter the result and remove duplicate items. Using an extensible plug-in architechure, PowerScan can scan StuffIt, Compact Pro and Font/DA suitcase files automatically. Filters can also be integrated into the application in a similar fashion. PowerScan takes advantage of Apple's Thread Manager (included) to run several tasks concurrently or in the background. Easy to use, yet very powerful user interface with full support for Balloon Help.

Shareware $10

ShrinkWrap™ 2.0.1

Author	Chad Magendanz	chad@halcyon.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://www.halcyon.com/shrinkwrap/	

ShrinkWrap was created for four basic purposes: To create disk image files quickly and efficiently, to provide a convenient and reliable means of mounting disk image files on the desktop, to seamlessly handle disk image files in their archived form, and to provide a freely distributable alternative to Apple's DiskCopy, DART and MountImage.

Shareware $20

Smoothie 1.12

Author	Peirce Software	info@peircesw.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://www.peircesw.com/	

Smoothie removes the jagged edges from pictures produced in your drawing and presentation applications using true subpixel anti-aliasing for superior results. It can be used to anti-alias single pictures, batch process many pictures, or even process an entire slide show for use in presentations as a Smoothie Slideshow or a QuickTime movie. Anti-aliasing is the central technology in Smoothie. The basic operation in anti-aliasing is to fill in the jagged edges between two colors with intermediate colors. Look closely at the before and after picture below to see the dramatic difference anti-aliasing makes for on screen graphics.

Shareware $24.95

SoundApp 2.0.2

Author	Norman Franke	franke1@llnl.gov
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://www-cs-students.stanford.edu/~franke/SoundApp/	

SoundApp is the premiere sound playback and conversion utility for the Macintosh. It is suitable for use as a sound-playing helper application with any of the popular WWW browsers, in addition to managing a collection of favorite sound samples and stand-alone usage.

Freeware

StuffIt Expander 4.0.1

Author	Aladdin Systems	info@aladdinsys.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://www.aladdinsys.com/	

StuffIt Expander allows you to expand StuffIt, Compact Pro, BinHex, and MacBinary files from your desktop. Add the Expander Enhancer from "DropStuff with Expander Enhancer" and StuffIt Expander is PowerPC accelerated, expands more formats (including .tar!), and joins StuffIt segments. Expander now handles segmented and multipart encoded files (ie: BinHex and UUencoded files).

Freeware

StuffIt™ Lite 3.5

Author	Aladdin Systems	info@aladdinsys.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://www.aladdinsys.com/	

StuffIt Lite is the original compression, archiving and security product for the Macintosh. Use it to compress or decompress StuffIt archives.

Shareware $30

StUU 1.1

Author	Stuart Cheshire	cheshire@cs.stanford.edu
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://ResComp.Stanford.EDU/~cheshire/	

StUU is a lightning fast, Internet Config aware, drag-and-drop UUdecoder for the Mac. Version 1.1 dramatically improves performance on Macs with RAM Doubler or Virtual Memory turned on. This utility was written because the author could not find a decent UUdecoder for the Mac. None of them were able to properly decode a huge 20 megabyte file he downloaded from the Internet. So, he wrote his own.

Freeware

Substitute 1.6.0

Author	Rocco Moliterno	rocco@mbox.vol.it
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/disk/	

Substitute 1.6.0 can be used as Mini Finder but as well as Desktop Utility; the package contains a version for each use. It's neat and very small with several, useful, options: Processes management. Also it tracks the foreground process and returns any got info in the main window. It can format and/or initialize disks, removables and diskettes, with "verify" option on or off. A "Verification only" option is available. It can launch Applications and Desk Accessories with the skill to make lists of Applications and Desk Accessories, and run them from a proper menu. It's able to copy (even in background), to delete, to lock/unlock files. It can move/rename, files, folders, disks (a disk can't be moved obviously). It can make full aliases of files, folders, disks. It can gather informations about files, folders and disks. It features SoundLevel and ApplicationFont management. It tracks all online volumes. Also it reports any Keyboard Layout available.Shutdown/Restart option available.

Shareware $10

suntar 2.0.5

Author	Sauro Speranza	speranza@cirfid.unibo.it
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/cmp/	

This is a Mac implementation of the tar (tape archive) program. Use it to archive or dearchive tar files.

Freeware

TechTool™ 1.0.9

Author	MicroMat	micromat@nbn.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://micromat.com/mmcs/	

TechTool by MicroMat Computer Systems is a useful diagnostic and system utility which offers these useful functions: Displays thorough System Hardware, Software and Disk Drive information; Tests for damaged System Files; Rebuilds the Desktop; Zaps the PRAM; and, Displays and Protects Manufacture Date & Hours of Use information.

Freeware

The Eraser 2.0.0

Author	Rocco Moliterno	rocco@mbox.vol.it
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/disk/	

The Eraser is a Drag&Drop utility to erase locked/unlocked files, nested folders, hard disks and diskettes. In "disk" mode The Eraser performs a complete deletion of disk catalog (without initializing/verifying process). In "file" mode, instead, The Eraser can perform a simple deletion (to allow the recovery of erased files by appropriate utilities) or a security deletion, by using a sophisticated procedure (to make impossible the recovery of erased files by whatever utilities). You can choose many options to determine how The Eraser should work in "Security Erasing" mode.

Shareware $10

The Musician 2.1.0

Author	Rocco Moliterno	rocco@mbox.vol.it
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/gst/snd/	

The Musician is a Drag&Drop application to play 'snd ' resources from each dropped file. The Musician 2.1 is able to scan, quickly, many HD, CD, diskettes, folders, to find 'snd ' resources to play and returns a lot of informations, while it's working. The Musician 2.1 can also work, very fast, in background and supports the Command-period/escape key tracking. DropKey: if you drag one or more items on its icon, while option key is down, when The Musician 2.1 finds 'snd ' resources in a file, tells you how many sounds that file contains and asks for consent, before to play them.

Shareware $10

To Do! 3.2.1

Author	Ambrosia Software	help@ambrosiasw.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	http://www.ambrosiasw.com/	

To Do! is a little Personal Information Manager. Using a traditional outline format, To Do! organizes information in an easily understandable manner. Enter as many different topics and subtopics as you like. Both topics and subtopics can include extensive notes. To Do! displays your list by topic or by priority. To Do!'s printing capability lets you take your full list or any part of it along with you.
Shareware $15

ToScrap 1.1.0

Author	Rocco Moliterno	rocco@mbox.vol.it
CD Location	Maclopedia:The Shareware:Utilities:
Internet URL	/info-mac/app/

ToScrap 1.1.0 is a Drag&Drop application, it copies data from dragged file, without open it, directly into Clipboard. In other words, if you drag, for example, a 'PICT' file on ToScrap 1.1.0 icon, the PICT will be copied into Clipboard, but the file containing the PICT will remain closed. The data copied can be pasted, naturally, following the usual procedure, but ToScrap is very useful to check, quickly, the contents of files. For example if you leave opened the Clipboard window then drag a 'TEXT' file on the ToScrap icon, you can read the text, comfortably and fast, without use a word processor... There's another nice and useful feature: from ToScrap about box you can gather info about current scrap file, also you can manage some its aspects, specifically clear the Scrap, read the Scrap into memory and put the Scrap on disk.

Shareware $10

TranStyle 1.0.1

Author	Rocco Moliterno	rocco@mbox.vol.it
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/text/	

Many applications and documents have 'styl' resources inside them. If you're running a non-Roman 2-byte script system (Japanese, Korean, Chinese...), and if your machine is not really fast, the first text drawing can be rather slow, when you open a file compiled under a Roman 1-byte script system. This is because your System should translate the style of text, before showing it. To dramatically increase the text drawing speed, you should drop your file onto TranStyle 1.0.1 before using it. TranStyle 1.0.1 has several option to translate styles, also it can zap all 'styl' resources from file dropped and works very fine in background...

Shareware $5

Trash Bag 1.1

Author	Ross Brown	AWOLSP@aol.com
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/disk/	

Trash Bag is an absurdly simple application you can add to your Startup Items folder, and you'll never have to worry about download clutter again. Trash Bag creates and maintains a folder that looks like a bag in front of your desktop trash can. Use it as the destination folder for encoded Internet downloads, Web browser cache files, or anything you doubt you'll need tomorrow, and Trash Bag will put them in the Trash automatically. Unlike the "real" Trash, your Trash Bag folder lets you open what's inside it, and you can access it through standard file dialogs. It's also great for making a temporary backup copy of a document before editing - just Option-drag it to the bag. Tomorrow, when you no longer need it, it'll be in the Trash.

Freeware

ZipIt 1.3.5

Author	Tom Brown	thomas.a.brown@yale.edu
CD Location	Maclopedia:The Shareware:Utilities:	
Internet URL	/info-mac/cmp/	

ZipIt is a full-featured Macintosh zip archival program. It can compress files with an efficiency comparable to Stuffit and Compact Pro, and is fully compatible with PKZip on the IBM and other zip implementations. ZipIt supports Internet Config, Macintosh Drag and Drop, and AppleScript, and can zip Macintosh files without losing any of the Mac-specific data. It also supports multi-segment archives, and much more. ZipIt runs native on PowerMacs.

Shareware $15
