Welcome To Pronto Family E-Mail!

The fun and easy way to stay in touch with your family & friends, without stamps, busy signals or interruptions during dinner.

System Requirements:

Windows 95: To properly install the **multimedia** interface of ProntoMail you will need at least 16 MB RAM. Users with less than 16 MB RAM will only be able to install the **professional** interface of ProntoMail.

Windows 3.1: Please install **ProntoLite**. ProntoLite offers the professional interface of ProntoMail.

Free E-Mail For Everyone In The Family

Pronto Family E-Mail comes complete with a professional interface for mom & dad and a fun multimedia interface for the kids in the family. With only one Internet account (example: AT&T WorldNet Services), Pronto Family E-Mail allows you to easily set up private mail boxes for everyone in the family. And that's not all! You also get these extra features to make your e-mail messages really fun and exciting;

EASY TO USE, FUN TO RECEIVE

* Animated greeting cards and puzzles
  - Did you forget a birthday - no worries, send a card in seconds!

* A complete paint & drawing package so you can create

your own masterpiece and send it with your
e-mail letter
- Draw mom or dad a special picture and send it to them at work!

✶ Record a voice message and send it with your e-mail letter
- Don't just type Happy Birthday, say it!

✶ Attach a video or movie clip and send it with your
e-mail letter
- great for grandparents - now they can see baby's first steps!

Staying in touch with your family (including aunts, uncles & cousins) and friends has never been more convenient or easier to do. So, install your Pronto Family E-Mail software and have fun communicating with your family & friends no matter where they are!

IMPORTANT NOTE!

You will need the following information before you install your Pronto Family E-Mail software. If you don't have any part of this information (5 steps listed below) please call your Internet Service Provider (ISP). Examples: AT&T WorldNet, Prodigy, Netcom, etc.

1) **'E-mail Address'**
The address other people on the Internet will be using to send E-mail messages to your family. Examples: lennon@worldnet.att.net, mccartney@ix.netcom.com, etc.

2) **'Login Name'**
Usually the part of your E-mail address prior to the '@' sign. Example: Lennon is the login name of Lennon@worldnet.att.net

ProntoMail

3) **'Login Password'**
   Your login password is given to you by your ISP to protect the privacy of your mailbox.

4) **'Receiving Mail Server Name'**
   Usually called "POP3 server". This is the name your ISP uses to store your incoming Internet mail before you can download it into Pronto Mail. Examples: postoffice.worldnet.att.net, popd.ix.netcom.com, etc. If you don't know your "POP3 Server Name" please call your Internet Service Provider before you install your Pronto Family Mail software.

5) **'Sending Mail Server Name'**
   Usually called "SMTP Server". This is the name your ISP uses to send your outgoing mail over the Internet. Examples: mailhost.worldnet.att.net, smtp.ix.netcom.com, etc. If you don't know your "SMTP Server Name" please call your Internet Service Provider before you install your Pronto Family Mail software.

If you are using AT&T WorldNet Services we have provided some of the information that you will need.

- **Receiving Mail Server Name**; postoffice.worldnet.att.net
- **Sending Mail Server Name**; mailhost.worldnet.att.net

If you don't have an Internet account, KidSoft recommends AT&T WorldNet Services (please click on the AT&T WorldNet Services button on this CD for more information).
