Chapter 1

willemsen-e

1.1 Jan Willemsen

Name: Jan Willemsen
E-Mail: jan@physik.uni-dortmund.de
Verz.: admins, imdb
Amigas: 3000T, 16+2 MB, ZyXEL Elite, HP-DAT, 2x 1 GB HDs, VLab, Multiface III, Cameron Handyscanner, A2065 Ethernet, HP LaserJet IIIp, Toshiba CD-Rom; CD 32 + SX 32, 2+2 MB.
Address: Schondellestr. 27
D-44229 Dortmund (Germany)
Phone: +49-231-734174

I'm from year '69 --- a very good year ;)

By now I work on my physics-degree. I am doing signal measurements on damaged silicon detectors for Atlas-LHC with very short shaping time...

My computer history begun with a VIC 20 from Commodore, than a C64 and later an A500. Some years ago I bought a A3000T --- very expensive that time. I have a Pentium 100 with Windoze 95, too. But I like my Amiga very, very much and won't miss it.

Additional hobbies are cinema, politics (I am member of the socialist-democratic-party, similar to the democrats in USA or labour party in UK).

Some pictures:

Wanted dead or alive

Picture 2: Here I am at work.

Picture 3: Here I am at home, sitting at my desk, shortly after my ↔ vacation in Florida.

Picture 4: This shows me in an art-work at the University of Dortmund.

Picture 5: This shows "young Jan" :)
