Animated Jigsaw User Maintenance Help

This program helps you manage Animated Jigsaw users and saved games.   The left scroll box shows you the users for the version of Animated Jigsaw on this CD.   If you have other versions you'll need to run this program from the appropriate CD.   After you select one or more users you'll see saved games in the right scroll box.

To delete a user and all of the user's saved games, select the user by clicking on his name and then click the delete user(s) button.   Delete lots of users and games at once by selecting more than one user and clicking the delete user(s) button.

To delete one or more saved games for a single user, first click the user, then select the saved games, then click the delete saved game(s) button.

To remove all the users and saved games and other bits and pieces of Animated Jigsaw from your system, click the Uninstall button.   (The add/remove programs uninstall will not remove the users and saved games from your hard drive but does remove them from the registry.   This program will do both.)   After uninstalling, you can run Animated Jigsaw again by inserting the CD in your computer.

The slider labeled Volume sets the volume for the game each time it runs.   If it is near the bottom, you'll hear nothing.

You must use the Exit button to exit the program.   When you exit, this program will check over the user list for Animated Jigsaw and make any final changes to reflect deleted users.
