

## **Installation for System 6.x users**

### **STEP ONE...**

Copy or drag both the "**Madness - RAGE! - UNregistered**" and the "**Methods to your Madness**" files into your System Folder **See Below...**

### **STEP TWO..**

Then select "Restart" from the Special menu.

**See Below...**

## **Installation for System 7 users**

**STEP ONE...**

Copy or drag both the "**Madness - RAGE! - UNregistered**" and the "**Methods to your Madness**" files into your System Folder See Below...

If you follow the above illustration, the Mac will ask you if it is O.K. to move the files into their proper locations inside the system folder. Simply click on the O.K. button. See Below

After you click on the O.K. button, the Mac will place the "**Madness - RAGE! - UNregistered**" file into the 'Control Panels' folder and the "**Methods to your Madness**" file into the System Folder.

## **STEP TWO..**

Then select "Restart" from the Special menu.

See Below...

## **E-installation - Permanently**

### **System 6.x**

Simply remove the two files "**Madness - RAGE - UNregistered**" & "**Methods to your Madness**", from your System folder and throw them into the Trash can.

### **System 7**

Simply remove the "**Madness - RAGE - UNregistered**" file from the 'Control Panels' folder & remove the "**Methods to your Madness**" file from the system folder. Then throw both files into the Trash can.

## **DE-installation - Temporarily**

### **System 6.x**

Simply remove the "**Madness - RAGE - UNregistered**" file from your System Folder and select 'Restart' from the 'Special' menu.

### **System 7**

Either remove the "**Madness - RAGE - UNregistered**" file from the 'Control Panels' folder in your System Folder and select 'Restart' from the 'Special' menu. OR select 'Restart' from the 'Special' menu and hold down the 'Shift' key on the keyboard until the mac starts up. This effectively disables ALL of your extensions including Madness™.
