

## **Forward**

**Madness™ is a control panel device (CDEV). This means that to make any changes or modifications to the way Madness functions you must first activate the 'Madness CDEV'.**

### **Activating the Madness CDEV - System 6.x**

**1. Select 'Control Panel' from the 'Apple' menu. See Below...**

**. Scroll down until you see the Madness icon, then click on it. Each of the Madness options presents itself on the right side of the Control Panel window. Here you may select different guns, adjust the volume, change the trigger and, most important, **print the registration form.****

## **Activating the Madness CDEV - System 7**

**1. Select 'Control Panels' from the 'Apple' menu. See Below...**

**. When the Control Panels window opens, simply double click the **Madness - RAGE - UNregistered** icon. Immediately, the Madness CDEV opens. Here you may select different guns, adjust the volume, change the trigger and, most important, **print the registration form**. See Below...**

## **electing different guns**

Simply put, a 'bullet' next to a gun's name means that gun is 'ON'. Whereas a gun that has no bullet next to it is 'OFF'. See Below...

## **turning guns 'ON' & 'Off'**

1. Select the gun you wish by clicking on it a single click.
2. Next, double click on the selected gun to either turn it 'ON' or 'OFF'

**Note:** Guns shoot in random order, all guns turned 'ON' will be in this random order.

## **Adjusting the Volume**

Madness's volume control is located in the bottom right corner of the CDev. It looks like a speaker...

## **changing the Volume**

Each time the speaker is clicked, the volume level increases by one. There are four different volume levels. The volume level returns to zero after the final volume level is reached. See Below...

## **he Trigger mechanism**

The trigger may be attached to many of the keys on your keyboard. The trigger is accessed by holding down the Command Key & the Shift key and then typing the trigger character that appears in the trigger box of the Madness CDev. See Below...

### **hanging the Trigger**

1. Activate the Madness - RAGE! Cdev.
2. Hold down the Command and Shift keys, THEN type the trigger character you prefer. This character will then appear inside the trigger box. See Below...

## **rinting the Registration Form**

To print the registration form simply click on the "**Print Registration**" button. See Below...

**fter you click on the 'Print Registration' button, the Mac will present you with the appropriate print dialog box. This will probably be either the LaserWriter Print Dialog Box or the Imagewriter Print Dialog Box. Simply select the proper commands and then click the O.K. button.**

**If everything goes correctly your printer will produce a self mailer envelope that you can either staple and send or insert into another envelope and send.**

**If you have any problems printing the Registration Form, just give us a call or send us a check for \$21 \* Amount of Registered copies you desire. We will promptly return a genuine real live, certified copy of [Madness - RAGE!](#)**
