Phoenix, Arizona - December 1, 1992 - Arizona Macintosh Users Group releases Volume VII of the "BBS IN A BOX" CD-ROM.

A Great CD-ROM for BBS or Personal Use!

The "BBS IN A BOX" CD-ROM is designed to allow Macintosh Bulletin Board Systems (BBS) running First Class, Hermes, Mansion, MUBBS, Nova Link, Second Sight, and Telefinder BBS software to link their system to the CD-ROM for an instant 1.4 GIGABYTE public domain and shareware library. BBS users may then read all of the descriptions from the CD-ROM directories and decide which files they desire to download.

This same library may be used by individuals who want the most current collection of Macintosh shareware and public domain software available at their finger tips. Descriptions of these files are provided in a number of formats including On Location, text format, Fileaker Pro, "Show Info" and our HyperCard index "PD Pig Out!"

1.4 Gigabytes!

Over 9,000 files and 640 megabytes of compressed Macintosh software is available on the "BBS IN A BOX" CD-ROM Volume VII. When decompressed this data exceeds 1.4 Gigabytes! This CD-ROM is the most current collection available with items added as late as November 18, 1992.

What's on the CD-ROM?

Volume VII contains over 61 AppleLink items, 297 Adobe Screen font files, 100 MUG items, 367 Art files, 482 Business tools, 367 DA's, 198 Educational tools, 540 Fonts, 554 Games, 1056 HyperCard tools, MacTechnical Notes in new format, 390 MUG Newsletter Reviews, 144 MIDI files, 331 Music files, 320 Programer tools, 79 QuickTime tools, 705 Telecom files including 44 Pete Johnson BBS utilities, 305 System7 tools, Decompression applications, 1040 utilities for the Macintosh, 240 Word processing tools and support articles plus much, much more!

Drag and Drop Description Reader & Easy Decompression!

Our off line description reader "Show Info" allows System 7 users to drag and drop files on to this tool to display descriptions of any of the files in the files folder before decompressing them. This is a nice feature for finding information on a single file without having to decompress it or look through a directory. Another tool on the disk allows you to drag and drop files for easy

decompression. All compressed files on Volume VII are in Compact Pro format for consistency and ease of use.

Special Sections for Educators, Networks, PowerBook, etc..

Volume VII contains more System 7 tools than ever and has special sections for Educators, Network tools, Powerbooks, Frontier, Icons, After Dark, new updated Tech Notes and many other areas. Chances are if it's not on BBS in a BOX its not available. With over 24 different catagories of Macintosh software BBS in a BOX is the most complete collection available!

Special Macintosh Dictionary

Mark Zimmermann has provided us with a special HyperCard edition of your very own Macintosh Dictionary. This dictionary contains 22,768 definition cards, and includes some simple look-up facilities. BBS in a BOX is proud to provide this to you, and thanks Mark Zimmermann for all of his hard work! Look in the Exclusive folder if you want to utilize this stack in decompressed ready to use form. Also, see the World Factbook, Works of Shakespeare and more on this CD-ROM!

Adobe Screen Fonts

Adobe Systems Inc. has allowed us to license their screen fonts on Volume VII for redistribution. This is the most current Adobe Screen Font collection on CD-ROM. You as a "BBS IN A BOX" registered user have the right to allow your users to download these screen fonts. In the Adobe section you will find a great HyperCard stack with all the screen fonts displayed for easy reference.

BBS Descriptions - Database Searches

Volume VII supports On Location search engines. In addition, text file listings, a FileMaker Pro database and other database tools are provided in various formats. "BBS IN A BOX" is the ONLY CD-ROM that provides BBS descriptions on over 640 megs of compressed Macintosh BBS software. Using "Show Info" you can display the description easily under System 7 as well.

Special Thanks!

Special thanks and credit to Bill Goodman, Pete Johnson, Chris Johnson, John Sintuer, Rusty Tucker, AMUG, Mark Zimmermann, Apple Computer, all registered users and the generous efforts of all the authors for helping make Volume VII of "BBS IN A BOX" a reality!
