From: Dave Kirkby Number Of Pages:13

To: Reid Brandon, Eimac. Date:

Hi Reid,

As you were probably aware, the CCS1 data you sent was incomplete. Once I knew who made it, I managed to track down the complete data sheet, from EEV, who apparently bought the M-O Valve company. EEV I gather have an archive at Chelmsford, Essex, England. You can keep this with the rest of the Y799 file in case you ever need it. Page 11 is poor on my copy.

enc GEC CCS1 data sheet.
