## SERIES

Introducing the LifeBook™ 400 Series from Fujitsu.

### DESIGNED FOR A MOBILE LIFE

You're busy. You're going places. You need a computer that can keep up with you. Like the Fujitsu Lifebook 400 series – a full-featured notebook with some very human touches. Details to make your day to day experience with a notebook personal and productive, no matter where you are. Like the power of a 120MHz Pentium™ processor. The pleasure of superb SVGA color video on a large, crisp display. The thrill of multimedia, thanks to a standard 10x CD-ROM, 16-bit Sound Blaster™-compatible sound, a Zoom Video port and MPEG 1 support for full-motion video playback capability. But mobility requires flexibility. And the LifeBook 400 Series delivers – with two type II or one type III PCMCIA slot, an IrDA-compatible infrared port and a optional Lithium ion battery. As well as the ability to add desktop functionality to your system by expanding it with a choice of docking units. And surprisingly, all this advanced, high-performance technology comes at a very affordable price. And it's backed by a one-year limited warranty, including 24-hour, 7 days a week, toll-free technical support. The LifeBook 400 Series. Powerful. Expandable. Flexible. In other words, the perfect computer for a mobile world. Like yours.

### BUILT FOR HUMANS

- **Contemporary Design**  
New look, feel and color
- **Additional Battery Options**  
Support for both Nickel Metal Hydride (NiMH) and optional Lithium ion battery packs
- **Port Replicator and Mini-Docking Station**
