Introducing the LifeBook™ 600 Series from Fujitsu.

Created through a process that involved a painstaking look at the way a notebook should feel, the way it travels, adapts and, of course, performs. First off, the LifeBook 600 Series is remarkably light. Pick it up and notice how light 4.4lbs feels in your arms. And it's ultra thin. At 1.2 inches it will slip into a briefcase with ease. A standard internal fax/modem means you're always connected, and a standard second Lithium ion battery means you'll stay that way. But it's also a productive world. So the LifeBook 600 Series is powered by ultra-fast Pentium® processors, 32-bit PCI and PC CardBus architectures, sped up with 256KB of level 2 cache and ready to take on applications with 16MB EDO RAM, upgradable to 80MB. Performance that comes vividly to life on a 12.1 inch active-matrix screen with full-motion video support. The most powerful feature of the LifeBook 600 Series, however, is flexibility. The enhancement unit option which includes an 8x CD-ROM drive, 3.5" floppy disk drive, stereo speakers and MIDI/joystick port, can quickly turn this mobile business tool into a multimedia powerhouse. And for some extra reassurance, it's also backed by a three-year limited warranty, including 24-hour, 7 days a week, toll-free technical support. The LifeBook 600 Series. The ultra-portable, ultra-productive notebook.
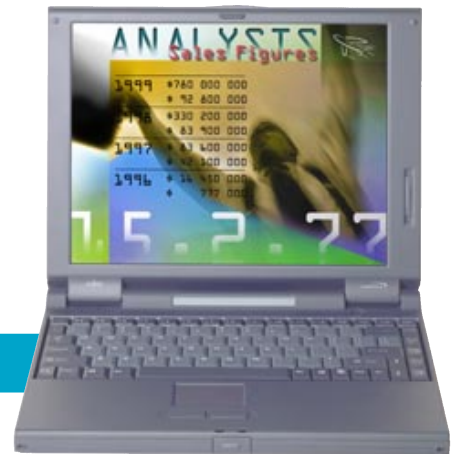

BUILT FOR HUMANS

- **Contemporary Design**
  Light, flexible and simple

- **Second Lithium ion Battery Standard**
  Provides an elegant solution for additional battery life and added keyboard comfort

- **Enhancement Unit Option**
  Full multimedia features with an 8x CD-ROM, stereo speakers and a MIDI/joystick port as well as an internal floppy disk drive

- **Port Replicator Option**
  For basic desktop expandability

- **Internal Fax/Modem Standard**
  For convenient communications

- **Notebook Status Indicator**
  Access to important operating information

- **Memory Upgrade Options**
  8,16, 32 and 64MB DIMM modules supported

- **Convenient Power Center Software**
  For easy comprehensive power management control, including on-the-fly adjustments for longer battery life

- **PCMCIA Card Locks and Theft Prevention Lock Slot**
  For added security

- **Palm Rest**
  To ensure typing comfort

- **Preloaded Software**
  Useful applications for instant productivity
