

ZDBENCH DIRECTORY README

*

WinBench 97's CD-ROM and video test files are extremely large. As a result, the WinBench 97 version on this CD does not contain these tests. To get the PC Benchmarks CD-ROM that includes the complete version of this benchmark, use the Benchmark Request Form included in the online help files and reference documentation.

**

This is the README file for the **\ZDBENCH** directory. It tells you about the subdirectories in the **\ZDBENCH** directory.

The **\ZDBENCH** directory contains the following subdirectories:

THIS DIRECTORY: CONTAINS:

WB97	WinBench® 97 Version 1.0 for measuring PC graphics, disk, processor, video, and CD-ROM subsystem performance under Windows® 95 and Windows NT®.
WS97	Winstone® 97 Version 1.0, an application-based benchmark of overall PC performance under Windows.

Each subdirectory contains a README file that gives more specific information about that subdirectory.

Note: Before you use any Ziff-Davis benchmark, you must agree to that benchmark's license agreement. You'll see the license agreement the first time you run any of the benchmarks. We also include the license agreement in each benchmark's documentation.

INSTALLING BOTH BENCHMARKS

If you received the benchmarks on CD-ROM, that CD-ROM may contain the Ziff-Davis PC Benchmarks Installer program. With this installer program, you can install both WinBench 97 and Winstone 97, as well as other programs WinBench 97 requires, at one time.

If you're running Windows 95 or Windows NT 4.0, the installer program starts automatically if the CD-ROM is in the CD-ROM drive. If you need to start the installer program, execute **INSTALL.EXE** from the CD-ROM's root directory using the Run command under Windows.

Note: You can also install each benchmark by executing the benchmark's **SETUP.EXE** file. For specific installation instructions, see the **README.WRI** files in **\ZDBENCH\WB97** (WinBench 97) and **\ZDBENCH\WS97** (Winstone 97).
