

Filename: bug2elep.avi
Source: German Photomorph Contest Entry
Approx Play Time: 3 seconds
Size of AVI file: 1,287,976 bytes
Resolution: 120x119

Comments:

By matching the bug's legs with the elephant's legs, a convincing morph is produced. If the animator doubled the point placement on the bug's legs, then spread the two points apart on the elephant, the animation would appear even better; the elephant's legs would morph out from the bug's legs, rather than fade in.
