Trying out CyberButton objects

The Home of the World-Wide Web This is the standards body of the World-Wide Web

If you are still uncomfortable with Windows 95, do take a Tour of Windows 95. You can use the Windows Explorer to navigate your hard disk as well all the stuff out there on your corporate network.

Here are some of the tools you will find useful in Windows 95.

Grand Old Applications

Program Manager
File Manager
Task Manager
Control Panel
DOS Prompt
Calculator
Notepad
Write
Paintbrush

Cool Windows Games

Solitaire
Mine Sweeper
Freecell
Hearts

Multimedia Tools

Media Player
Sound Recorder
Sound Volume Control

Network Tools

Net Watch
Telnet
WinPopup

You will find the new Defragmentor absolutely invaluable to keep your hard disk constantly in shape for the zillions of disk-hungry applications.

Last but not least, take a look at the Registry Editor. The Windows registry is where well designed application will store their settings. The days of the .INI files are numbered!
