

## **PRESS INFORMATION**

---

Following information is meant for the press only.

In this same directory you will find some pictures of the Private Collections Volume I Cover , that can be used in reviews. We also give the authority to press people to use several pictures from this CD for review purposes.

To make your life more easy, we took the liberty to write a small article about this CD-ROM production. It is yours to use or to adapt !

### ***IMAGE LINE : The producers ...***

---

This CD is produced and commercialised by IMAGE LINE. IMAGE LINE is a company based in Belgium (Ghent) and is specialised in producing high-quality Erotic CD-ROM's. We focus mainly on interactive Sex-Games and picture CD-ROM's. IMAGE LINE works closely together with the Swedish company called Private, that produces hard-core videos and magazines. This Private Collections Volume I is the result of a nice collaboration. Private provides excellent hard-core pictures and IMAGE LINE adds their CD-ROM knowledge to it. The result : a fine, unique picture CD with excellent photos and an easy to use graphical interface. Number 1 has been born and more will follow.

- Interactive CD-ROM Magazine***
- Video-CD***

----- ***Our article about Private PornMania***

***Double CD*** -----

----- ***(Free to use or to adapt)***

-----

**1. PornMania Double CD-ROM**

*PornMania CD # 1 : Dos Based CD-ROM*

Guide Dennis through the different levels trying to avoid the deadly hookers. You should try to shoot the gray ones and fuck the blond-

ones. Private Pornmania contains 4 different erotic play levels:

Dennis in the City

Dennis on Ice

Dennis in the Jungle

Dennis in the Factory

While playing these levels you should try to open doors. Each time a different sub-game is presented to you :

\* **PornTris** : *PornTris is the adult version of the popular game. You reveal a hidden erotic movie while you are controlling blocks falling down your screen. The aim of the game is to complete as many lines as possible. Each completed line will disappear and a line of the hidden movie will reveal.*

\* **Memory** : *Memory is a card game where each card contains erotic pictures. You should try to find all identical ones.*

\* **Solver** : *Solver is a brain-teaser. Here you have to use your logical way of thinking. Try to get to the end-point by turning doors and pushing blocks.*

\* **Maze** : *Each time this game is presented to you, you get a computer generated maze. Solve it and you get to see the underlying erotic picture.*

An easy-to-use graphical menu system is build in. It lets you play all games separately, let you see all exclusive pictures and lets you see all full-screen DOS movies.

At start-up you choose your language (English, Français, Deutch and Nederlands).

#### *PornMania CD # 2 : Windows Based CD-ROM with Movies + sound support*

This second CD is a Windows based MOVIE CD presented again through a nice menu system with background sound. If you have a sound card you get full sound support, if not you just see the movie.

Just pick your AVI-file format movie you want to see (movies for a total of ± 72 minutes).

'**Private Collections Volume I**' is an exclusive collection of over 2000 hard-core Private XXX-pictures. It is presented to you in an original way, with its **own graphical user interface** for Windows.

'**Private Collections Volume I**' CD-ROM installs easily. Just put in your CD-ROM drive and type 'INSTALL'. This brief installation procedure just creates a Windows Group with the different icons of Private Collections. Except of one INI file, no files are copied on your Hard disc (like it has to be).

At the start-up of this Private Collections CD, you are asked to choose one of 9 languages by clicking the appropriate flag. You can choose between Dutch / French / German / Spanish / Portuguese / Swedish / Danish / English / Italian. Once you have chosen your language, the set-up screen changes in your languages (which is a nice feature). If you have a sound card installed, you can choose for background music, which will play various WAV files while enjoying these pictures.

A brief explanation about the floating toolbar is visible at set-up. Now we are ready to go ! Just press the OK button and the first screens is showed to you. You are presented by the intro screen from which you have to pick one of the 10 Private Magazines available on this CD. You see the different covers, and you pick one by clicking the cover. Next is to pick one of the girls that feature in this Private Magazine. Make your choice and move on. If you want to see them all, just start the slide show. This slide show will show you all the pictures available from that point on.

If you have chosen the right girl you want to admire, you get different screens each presenting a filmstrip with all available photos. Once again you can start the slide show starting from any picture.

If the slide show is going to quickly, just edit the PRIVATE.INI file that you'll find in your Windows directory and has been installed there at initial set-up time. You can edit the entry SlideShowDelay and fill in the appropriate number.

This '**Private Collections Volume I**' also provides you with a nice Private Screen saver. Just click the icon to preview this screen saver or to install it at your system.

Further on you'll find slide shows of the other Image Line products. These are Private PornMania Double CD and Private Prison which are both interactive titles, Private Collections Volume I and Volume II which are both a great set of XXX-rated pictures from Private, and PornTris CD which is a great set of 3 Erotic Games in a 3D rendered space environment !

A demo version of PornMine for Windows is also on this CD-ROM. It offers you the well-known Microsoft Mine for Windows games, but you'll like it better as you play it on a nice, hot picture. An extra reason to demine your Windows.

This '**Private Collections Volume I**' is a well-designed CD-ROM with a nice and easy to use graphical interface (with possibility to have background music). The installation procedure is straight forward and does not install a bunch of files on your (to small) hard disc. Everything runs directly from CD. The pictures are unique and are not to be found on any other CD's. They are not a collection of pictures found on

different BBS's, but are a unique set of exclusive Private pictures. The pictures are presented to you magazine-by-magazine and girl-by-girl. You can relax and see them all by activating the slide show feature.

Private Collections Volume I is one of the few Erotic CD-ROMs that is already Windows '95 ready.

### ***About the other Image Line CD-ROM Productions :***

#### **1. Private Collections Volume 1**

**'Private Collections Volume I'** is an exclusive collection of over 2000 hard-core Private XXX-pictures. It is presented to you in an original way, with its **own graphical user interface** for Windows.

**'Private Collections Volume I'** CD-ROM installs easily. Just put in your CD-ROM drive and type 'INSTALL'. Private Collections Volume I is one of the few Erotic CD-ROMs that is already Windows '95 ready.

## **2. Private Prison : The ultimate Erotic Game**

'**Private Prison**' is a full interactive XXX-game CD-ROM for Windows ! It is one of the first FULL EROTIC ARCADE games for Windows.

With '**Private Prison**' you will be in charge of your own private 'luxury island' prison. With your chopper you fly over the island and inspect the different girls. If you re-establish the video-link by playing an arcade part, you can see the action.

'**Private Prison**' has been designed with both the lower end CD-market (i.e. single speed CD-ROM) as the higher end market (i.e. double speed or more) in mind, as Private Prison provides through digital video for both markets. The only thing to do is to select at set-up time small video mode for single speed and normal for the others. '**Private Prison**' will provide you with hours of fun, offering you high-

quality digital movies combined with exclusive full colour BMP pictures. All this is packed together in a unique EROTIC ARCADE game for WINDOWS.

This CD is multi-language with Dutch / French / German / Spanish / Portuguese / Swedish / English / Italian language support !

### **3. Erotic PornTris & FaceTris in CyberSpace**

'**Erotic PornTris & FaceTris in CyberSpace**' is finally available on CD-ROM !

'**Erotic PornTris**' is **THE Erotic version** of the well-known game. Different blocs are falling down and you need to move, rotate and drop them to make full lines. You don't get any points, but ... you get to see the beginning of an EROTIC movie line-by-line.

If you succeed to see clear the entire screen, you get to see the full digital movie.

'**Erotic FaceTris**' is another funny **EROTIC game**.

Instead of falling blocks, you are confronted with coloured falling duo-smiles (JJ). Get minimum 4 smiles of the same colour together and they will disappear and you get to see the beginning of a movie line-by-line. If you make it to the end, you get to see the entire EROTIC Movie !!

To play all these games, you first need to take your CyberLamorghini and fly through CyberSpace...

**More than 615 Mb of Erotic digital movie** for both single speed as higher speed CD-ROM's.

**Unlimited levels** of PornTris and FaceTris guaranties you hours of fun ! Included is also a CyberViewer to see all EROTIC digital movies without having to play one of the games ... **REAL VALUE FOR MONEY !!**

### **4. Private Collections Volume II**

'**Private Collections Volume II**' is another exclusive set of over 2000 hard-core Private XXX-pictures. For more information see Private Collections Volume I.

### **5. Private Investigator**

Private Investigator is a CD-ROM that is something different from all the rest. Something very special. Something very fun-to-play.

What is **PRIVATE INVESTIGATOR** ?

**Private Investigator** is the newest CD-ROM production of Image Line,

the makers of Private PornMania and Private Prison.

It is a special Hard-core Erotic CD-ROM, unique in its kind, as it incorporates some new technology that gives people a click-and-response CD instead of a click-and-wait system.

This **Private Investigator** CD-ROM offers you :

- a virtual 360° 3D-rendered office where you can walk around freely and use almost every object in this office
- full screen and truly Interactive 'Play-with-a-girl' session with custom made blue-screen shots (watch her doing whatever you want her to do !)
- a unique Sex-Jump-and-Shoot Arcade platform game with smooth moving sprites and up to 15 levels of fun (each in three difficulty levels). Incorporates also :
  - \* interactive fucking to make hookers come
  - \* fighting against big NBA players and mean karate kids
  - \* avoiding 'wheelchair-ing' Grannies

Extra game levels will be available on Private's Internet WEB site.  
Check it out !

- a joke telling moose with over 1500 jokes (about sex, blondes, lawyers, etc.)
- a quoting skeleton with over 300 quotes of some very famous people (helps you to keep up your bar appearance)
- and, of course, lots of Sex and fun things to do...

What is the story all about ?

Well, you are Dick Slammer, the famous Private Investigator, who became (without ever wanting it) a specialist in Adultery cases !  
So on one of those days, you come in to your 360° 3D-rendered office, and wonder around what that day will bring to you.  
You try to have a good laugh with the joke telling moose in your office or you want to keep up your bar-appearance by one of the quotes of the skeleton. Perhaps you feel more for a zap through the different Sex Movie Channels each with a lot of hard-core Sex. Perhaps you just pick up your telephone and listen to some telephone sex. Or you could use your PC for what a PC is used the most : i.e. playing some Sex games and viewing nasty pictures.

But you are not going to do this right now, because Nancy just entered your office.

Again, a classic case of adultery !

This time, you really feel sorry for this sensual and sexual attractive girl, and you want to help her. But you won't do it for the money,

because if you succeed Nancy will reward you with her body !  
She has already gone to your bedroom and she is impatiently waiting for you to come and play with her.  
Now, let's find that bastard cheating on his wife. You walk out the office and take your chopper to fly (3D-rendered) to one of the 15 different levels.  
It is here that starts the Sex-Jump-and-Shoot Arcade game.  
You need to find her husband and put it all on tape. But where the hell are you going to find a camera and video tapes and keys to open doors and ...

Well, just manage your way through the different levels (each level can be played in three different difficulty levels : Easy - Medium - Hard) and :

fight against impressive NBA players (have you ever been dunked ? It is not a nice experience)  
fight the mean, lean karate kids  
avoid the grannies driving around in there wheelchairs  
but, most of all, interactively fuck the hookers and make them come.  
You have to fuck them in a lot of different positions. Some of them she likes, others not. If you manage to make her come you sometimes get rewarded with keys, guns, bullets, video tapes, camera etc. All those things you need to solve this case.  
find new extra levels on Private's Internet WEB site.

The game levels can be played in different Windows modes.  
Either you can play them Windowed (resolution 160\*100, 320\*200, 640\*400, Any resolution in between or full screen - to choose from depending on your PC system), or you play it Full Screen (DISPDIB format - the fastest mode).

Once succeeded, you get back to the office and Nancy is waiting to reward you with her body. You enter the bedroom and you come into a Full-Screen, truly Interactive 'Play-with-Nancy'-session !  
Undress her, play with her, turn her around and let her play with her love tools. Use your magnifier lens to get a closer look and enjoy it all again afterwards by watching it on video tape.  
You will need all your imagination to please Nancy.

And this goes over and over again, 15 different levels (each in three difficulty levels) and hours of fun to play ! For those who play all levels, a nice extra reward is waiting for you. What reward ? Well play all levels and find it out yourself !

The CD comes with a nice Set-up program which gives you set-up

possibilities for Audio channels, Gamma correction (screen), difficulty levels, screen scrolling methods (if you are used to some methods, then adapt it the same way), Arcade framerate (depending on your system and graphical video board - you will be limited in your possibilities), etc....

This may all seem very technical but it offers you a possibility to get the game running even on less performant systems, which is better than not running at all !

A slide-show of the other products completes this CD-ROM.
