

Scooby Doo Screen Saver
by Scott Traube

I just made it from a bunch of sounds off various Scooby pages on the net.
Just unzip this to your themes folder(or whatever you choose) and then run themes from the control panel. Some sounds or pointers may not work in the theme setup, but once you enter OK or APPLY they will.
I am currently making a few others, which will be much better quality.

The new ones I'm making consist of:

- Mountain Biking Theme
- Dukes of Hazzard Theme
- James Bond theme

I can always make some themes for cash too if anybody wants one.
