

Hardcopy Ideas

This document contains notes and brainstorming for my vision of the printed book. Feel free to ignore this or send me your ideas a/o suggestions. If you make a good one, you'll be in the credits. ☺

Paperback / Hardcover:

I think I want both. I want a hardcover edition for myself and a paperback for everyone else. If I made all of the books paperback people would get upset over the huge, and largely unnecessary, price increase.

Trim

This would be the size of the book. I want something fairly portable. It shouldn't be really wide or really tall. At the same time this is a guide not a reference so it should be of a comfortable size to sit down and read wherever you are. I would prefer 7 ¼" x 9".

Paper

I like the paper of the book "PDF Reference 2nd Edition". Its glossy and the book is about an inch thick with 352 physical pages. So, I think 350 PPI would be good for mine. I should be able to fit the first two parts (Part 1 and Part 2) into that amount.

ISBN

Need to look into this.
