

Welcome to the DOGHOUSE!

This application is very simple in intent:

It reminds you of significant events throughout the year.

Maybe you've been in the **DOGHOUSE** before because you've missed something?

No more! Now you can remember

- Those birthdays
- That wedding anniversary
- To make sure there's enough in your account for that standing order or direct debit
 - annually
 - monthly
 - quarterly
 - every 4 weeks
- To organise that monthly meeting
- If you're really forgetful, it can remind you every day of something

Chances are you've been in the doghouse more than once because you forgot an important event. Your spouse's birthday perhaps. Or your wedding anniversary. With **DOGHOUSE** it will never happen again. You won't miss another important happening. You won't be caught short when those direct debits hit!

You can instruct Doghouse when to start reminding you of a coming event. And the reminder will pop up daily from then on, until the event is passed.

Since it's such a useful program, you'll want to have the program in your **STARTUP** group so that it runs whenever Windows starts. Doghouse will offer to put itself there on its first few runs on your system.

Once you've tried it, you won't want to be without it. For ordering information, see **Register** in the Help menu. You'll find it easy, affordable and quite indispensable!
