Help About...

The Help command shows a dialog where provides some information about this application.

Help Using Help

The Help command provides access to the help system and shows how to use the Windows online help.

Edit Select a font Command

The Edit|Select a font command lets you choose a font the current list window. The font information is saved in the document so as to remember the window setting next time you open the document.

Some fonts have different width of each character, in order to have a aligned list data in the window, certain fonts can be used, such as Courier or Courier New etc.

The Toolbar

The Toolbar is a row of buttons at the top of the main window which represent application commands. Clicking one of the buttons is a quick alternative to choosing a command from the menu. Buttons on the toolbar activate and deactivate according to the state of the application.

Button	Action	Menu Equivalent
	Create a new document	File <u>N</u> ew
	Locate and open a file	File <u>O</u> pen
	Save the file in the active window	File <u>S</u> ave
	Add a entry to the list	Edit <u>A</u> dd
	Edit the selected entry in the list	Edit <u>E</u> dit
	Delete or Cut selected entry to Clipboard	Edit <u>D</u> elete
	Copy selected entry to Clipboard	Edit <u>C</u> opy
	Paste the entry from Clipboard	Edit <u>P</u> aste
	Select a font for the display	Edit <u>S</u> elect a font
	Undo previous editor action	Edit <u>U</u> ndo
	Print the active window	File <u>P</u> rint
	Preview the printout of the active window	File <u>P</u> rint Preview
	Display help file contents	Help <u>C</u> ontents
	Toggle the tool bar to vertical sides or horizontal side in the window.	

Edit Add Command

The Edit|Add command adds a new entry to the file in the current window and automatically sorted by last name and then first name in the list.

For information on how to use Help, press F1 or select Using Help from the Help menu.

Edit Menu

The Edit menu provides commands to undo edits, access the clipboard, and to delete text.

Undo Undo the previous operation.

Copy Copy selected text to the clipboard.

Paste Move text from the clipboard to the current document.

Add Add a new entry to the document.

Edit Edit the selected entry in the document.

Delete Delete the selected entry.

Select a font Select the font used to display the document.

File Menu

The File menu provides commands for creating new files, opening existing files, saving files, printing files, and exiting the application.

<u>New</u>	Create a new, untitled, document.
<u>Open</u>	Open an existing file.
<u>Save</u>	Save the current document if its contents have changed.
<u>Save As</u>	Save the current document under a new name.
<u>Print</u>	Print the current document.
<u>Print Preview</u>	View a sample printout of the current document.
<u>Print Setup</u>	Set printer characteristics.
<u>Exit</u>	Exit phone application.

Search Menu

The Search menu provides commands to find and replace text.

<u>Find</u>	Find a pattern of text.
<u>Replace</u>	Replace one pattern of text with another.
<u>Next</u>	Find and/or replace the next occurrence of text pattern.

Help Menu

The Help menu provides access to the help system and the about dialog.

<u>C</u> ontents	Help topic contents.
<u>U</u> sing <u>H</u> elp	Windows help file for how to use the online help.
<u>A</u> bout.....	About this application

Copying Text

To copy text to a document from the clipboard, position the cursor at the desired insertion point, and choose Edit|Copy from the menu.

Deleting Text

To delete text from a document, select the text, and choose Edit|Cut or Edit|Delete from the menu. Cut will put the deleted text in the clipboard, and Delete will simply delete it.

Exiting

To exit the application, choose File|Exit from the menu.

Edit Window

The edit windows in this application allow reading, editing, printing and saving text files up to 64K characters in size.

Drag/Drop from the File Manager

A file can be opened into an editor in the application by dragging the file from the File Manager, and dropping it on phone's main window.

Printing

There are three commands on the File menu which support printing of documents from the application. File|Print Setup is used to select and configure a printer device. File|Print Preview displays a special preview window which shows how the document will appear when printed. File|Print causes the current document to be printed.

Edit Copy Command

The Edit|Copy command leaves the selected text intact and places an exact copy of it in the clipboard. To paste the copied text into another document, choose Edit|Paste.

Edit Cut Command

The Edit|Cut command removes the selected text from your document and places the text in the clipboard. Choose Edit|Paste to paste the cut text into another document. The text remains selected in the clipboard, and can be pasted multiple times.

Edit Paste Command

The Edit|Paste command inserts the text currently selected in the clipboard into the current window at the cursor position.

Edit Undo Command

The Edit|Undo command restores the file in the current window to the way it was before your most recent edit operation. Undo inserts any characters you deleted, deletes any characters you inserted, replaces any characters you overwrote, and moves your cursor back to a prior position.

Edit Clear All Command

The Edit|Clear All command deletes the entire contents of the current document. Use Edit|Undo to restore the contents.

Edit Delete Command

The Edit|Delete command deletes the currently selected text from the current document. The text is not placed in the clipboard. Use the Edit|Undo command to restore the text.

File Close Command

File|Close closes the currently active window.

File Exit Command

The File|Exit command exits phone. If you've modified documents without saving, you'll be prompted to save before exiting.

File New Command

The File|New command opens a new, untitled phone database document, and makes it the active window.

File Open Command

The File|Open command displays the Open a File dialog box so you can select a file to load into a new document window. You can also create a new document by naming a file that doesn't currently exist.

File Print Command

The File|Print command prints the contents of the active window. Use File|Print Preview to see how the document will be laid out on printer pages. Use File|Print Setup to select a printer, and to set printer options.

File Print Preview Command

File|Print Preview opens a special window that shows how the active document will appear when printed. The preview window shows one or two pages of the active document as they would be laid out on printer pages. Controls on the window allow you to page through the pages of the document.

File Print Setup Command

The File|Printer Setup command displays the Printer Setup dialog box which allows you to select and configure the printer to be used to print documents in the application.

File Save Command

The File|Save command saves the document in the active window to disk. If the document is unnamed, the Save File As dialog box is displayed so you can name the file, and choose where it is to be saved.

File Save As Command

The File|Save As command allows you to save a document under a new name, or in a new location on disk. The command displays the Save File As dialog box. You can enter the new file name, including the drive and directory. All windows containing this file are updated with the new name. If you choose an existing file name, you are asked if you want to overwrite the existing file.

Search Find Command

The Search|Find command searches the current document for a text pattern. The command displays the Find dialog which controls the search process. Options in the dialog determine whether only whole words are to be matched, whether the case of characters is significant, and whether the search should be conducted forwards or backwards through the document. As each match is found, it is highlighted in the document.

Search Next Command

The Search|Next command repeats the last Find or Replace operation.

Search Replace Command

The Search|Replace command searches the current document for a text pattern, and replaces occurrences of the of the pattern with new text. The command displays the Replace dialog which controls the search/replace process. Options in the dialog determine whether only whole words are to be matched, and whether the case of characters is significant. The dialog is also used to specify the pattern to search for, and the text to replace occurrences with.

Window Help table of contents

The Help|Contents displays the help contents page.

Features of Phone Database

This is a MS-Windows application that collect the information of one's phone number and addresses etc. The following lists the main features of this program.

- (1) Each entry includes Last Name, First Name, Home Address, Business Address, Home Phone Number Work Phone Number, Fax/Data Number, Pager Number, Cellular Phone Number Email Address and the Notes of the person.
- (2) You can add a new entry to the list, edit the selected entry and delete the highlighted entry in the list window. This operations can be undone.
- (3) The Copy/Paste feature is implemented. This function can also be undone.
- (4) The display font is changable via a font selecting dialog box. The new font characteristics can be saved in the document so that you can always have the preferred font.
- (5) The phone list can be printed to the attached printer, and the print/preview is available if you want to do so. The font for the preview window or print out can be changed independently from the list window.
- (6) The toolbar location can be toggled to be located in the left side, right side or the top of the window.
- (7) The right mouse button is programmed to have most of the menu commands popup in a floating window so that one can easily use the mouse for the menu operation.
- (8) At the bottom of the screen a status bar is added to include the keyboard mode, i.e. Capital Lock, Numerical Keypad, Scroll Lock and the Insert Status. The current date and time is also given in the status bar as well as the selected entry and the total entry in the opened document.
- (9) In the About... dialog under Help menu, the phone application icon is animated with phone ring. If a multimedia sound card is present, it uses the multimedia speakers, otherwise the computer internal speaker is used.

Edit Edit Command

The Edit|Edit command transfers the selected entry to a buffer and opens a dialog window for you to modify the data fields. Once you finish the editing and choose OK. The new data put back to the list and sorted base on the new information.

Cursor Movement Keys

Key(s)	Function
Arrow key	Moves the cursor left, right, up, or down in a field.
End or Ctrl+Right Arrow	Moves to the end of a field.
Home or Ctrl+Left Arrow	Moves to the beginning of a field.
Page Up or Page Down	Moves up or down in a field, one screen at a time.

Dialog Box Keys

Key(s)	Function
Tab	Moves from field to field (left to right and top to bottom).
Shift+Tab	Moves from field to field in reverse order.
Alt+letter	Moves to the option or group whose underlined letter matches the one you type.
Arrow key	Moves from option to option within a group of options.
Enter	Executes a command button. Or, chooses the selected item in a list box and executes the command.
Esc	Closes a dialog box without completing the command. (Same as Cancel)
Alt+Down Arrow	Opens a drop-down list box.
Alt+Up or Down Arrow	Selects item in a drop-down list box.
Spacebar	Cancel a selection in a list box. Selects or clears a check box.
Ctrl+Slash	Selects all the items in a list box.
Ctrl+Backslash	Cancel all selections except the current selection.
Shift+ Arrow key	Extends selection in a text box.
Shift+ Home	Extends selection to first character in a text box.
Shift+ End	Extends selection to last character in a text box

Editing Keys

Key(s)	Function
Backspace	Deletes the character to the left of the cursor. Or, deletes selected text.
Delete	Deletes the character to the right of the cursor. Or, deletes selected text.

Help Keys
