```

1.2   What it actually does...

```
 Introduction
 ============

 This blanker blanks the screen.
```

1.3   Configuration preferences...

```
 Interface
 =========

        Save - save and use the current settings.
```

```
        Use – use the current settings.

       Test – test the blanker under the current settings

     Cancel – cancel all changes.
```

```
Number of Balls – this selects the number of bouncing balls, currently
                  they look like dots but in the future they will evolve into
                  colored balls when i have some time... maybe even sound too!
                  Default: 5.

   Display Mode – the screen mode to use. If the preferred screen cannot
                  be opened then the default screen mode will be tried, if
                  this fails then the minimum screen mode required for this
                  blanker will be tried, if that fails then the blanker will
                  quit and let SwazBlanker choose an alternative blank
                  method.
                  Default: Lo-Resoloution, 2 Colors.
```

1.4 Bug fixes and updates...

```
