This document consists of significant notices about current release of MegaDoc.

1) This release of MegaDoc is not intended for run under any localized Palm OS versions. It supports only standard Palm OS fonts, which consists of English and most national European chars. You can try to launch MegaDoc in localized Palm OS version, but we cannot guarantee it's normal functioning in that case.

2) Palm DOC documents are still have limited support. It may takes certain time to load such documents. Also it does not allow writing compressed Palm DOC documents. So if you will change Palm DOC document into MegaDoc it will be written in uncompressed form.
