ReadMe for *MechWarrior 2 for Mplayer*

1) - Mplayer only supports MechWarrior2 for Windows 95
2) - You must install NetMech Support
3) - Speech Is Supported.

1) - Mplayer only supports MechWarrior2 for Windows 95:
Currently, Mplayer only supports the Windows 95 version of MechWarrior 2. In the near
future, we hope to support the DOS version of this game. Stay tuned.

2) - You must install NetMech Support:
During the installation of MechWarror2 for Windows 95, you will be asked if you want to
install NetMech support. Select Yes. Mplayer requires that NetMech support be
installed; otherwise, our Mplayer-enabler installation will not detect the presents of
MechWarrior2 for Windows 95 on your hard drive.

3) - Speech Is Supported:
Once the Mplayer-enabler for MechWarrior 2 is installed, you can voice chat with your allies/opponents
during gameplay over Mplayer. Pressing the Scroll Lock key while talking into your microphone will allow you to send
voice messages through your microphone and over your modem to remote players in the game.
