Table Of Contents

1 Assembly Language: The True Language Of Programmers

| | |
|---|-----------|
| | 1 |
| Multiplication And Division In Assembly Language | 2 |
| Fixed Point Arithmetic | 2 |
| The four fundamental arithmetic operations | 4 |
| Why fixed point numbers? A sample application | 7 |
| Custom Mathematical Functions | 9 |
| Tables | 9 |
| Approximation | 11 |
| High Speed Tuning: Optimizing Comparisons | 13 |
| OR instead of CMP | 13 |
| String comparisons | 14 |
| Variables In Assembly Language | 14 |
| Accessing Pascal variables | 14 |
| Accessing arrays and records | 14 |
| Code segment variables | 15 |
| Circular arrays | 15 |
| Bit mask rotation | 16 |
| Masking a specific number of bits | 16 |
| Mysterious Interrupts | 17 |

| | |
|--|-----------|
| Changing vectors | 17 |
| Calling the old handler and exiting | 18 |
| Disabling interrupts | 18 |
| Reentering DOS | 19 |
| Intercepting CTRL-C and reset | 20 |
| Tips On Programming Loops | 23 |
| Nesting | 23 |
| 16/32 bit accesses | 23 |
| Practical 386 Instructions | 24 |
| The MOVSX and MOVZX instructions | 24 |
| Different SET commands | 24 |
| Fast multiplication and division: SHRD and SHRL instructions | 24 |
| Enhanced multiplication with IMUL | 25 |
| Using 386 instructions in Pascal programs | 25 |

| | | |
|----------|--------------------------------------|-----------|
| 2 | Assembly Language In Practice | |

Split-screen And Other Hot Effects

| | |
|---|------------|
| | 93 |
| Basics | 93 |
| How Split Screen Works | 94 |
| Scrolling In Four Directions | 98 |
| Using the GIF loader for large images | 100 |
| Combining It All: Split-screen With Scrolling | 103 |
| Door Closed: Squeezing An Image | 104 |
| Smooth Scrolling In Text Mode | 105 |
| A Different Kind Of Monitor: Flowing Images | 108 |
| Let's Add More Color Please: Copper Bars Without Copying | 109 |
| Shake On The Screen: The Wobbler | 115 |
| Real-time Animation Made Easy: Palette Effects | 118 |
| Fade-out effect | 118 |
| Fade-in effects | 119 |
| Fading to the target palette from any source | 120 |
| Film techniques: Fading from one image to the next | 123 |
| The faster alternative: Animation through palette rotation | 132 |
| Blazing Monitors: FIRE! | 136 |
| The Secret Of Comanche: Voxel Spacing | 139 |
| Enlarging Graphics: The Magnifying Glass Effect | 144 |

6 Sprites: Rapid Action On The Screen

| | |
|--|------------|
| | 147 |
| The Basic Ideas Behind Sprites | 147 |
| Reading And Writing Sprites | 148 |
| Beyond All Borders: Clipping | 149 |
| The Unit Sprites | 150 |
| Use Scrolling For Realistic Movement..... | 156 |

7 The Third Dimension: 3-D Graphics Programming

| | |
|--|------------|
| | 161 |
| Mathematics For Graphics Enthusiasts | 161 |
| The vector | 161 |
| Calculating (computing) with vectors | 162 |
| Presenting 3-D Figures In 2-D | 164 |
| Reshaping Objects: Transformations | 165 |
| Wiry Figures: Wireframe Modeling | 166 |
| Get A Perspective: Glass Figures | 181 |
| Hidden Lines | 193 |
| Throwing Shadows: Light Source Shading..... | 195 |
| Impressive Top Surfaces: Textures | 200 |

8 Modern Copy Protection

| | |
|--|------------|
| | 211 |
| Protecting Your Programs: Passwords | 211 |
| High-level Language Programs At Machine Level | 220 |
| Pascal program structure | 220 |
| A Protected Password Query | 224 |

9 Protect Your Know-how: Protection Tricks

| | |
|---|------------|
| | 229 |
| Dissecting Programs | 229 |
| Removing the camouflage: Compression/decompression programs | 230 |
| Debugging programs: Turbo Debugger | 230 |
| Not hexing: Hex editors | 237 |
| The Debug Interrupts | 240 |
| Masking interrupts | 240 |
| Changing the debug interrupt | 240 |
| Hiding data in an interrupt vector | 240 |
| Fooling The Debugger | 242 |
| The memory trick | 242 |
| Ambiguous instructions | 242 |
| Stopping TD386 | 243 |
| Self-modifying Programs | 244 |
| Checksums | 244 |
| Encryption algorithms | 244 |
| The PIQ technique | 245 |
| Using compression programs | 245 |

Train 'em: Game Trainers And Debuggers 246

- Rummage around: Finding variables 246
- Handling the corner data 247
- Programming trainers 248
- Trainer for the RAIDERS game 249

10 Memory Management

257

Conventional DOS Memory 257

EMS: A First Step Towards More Memory 259

- EMM Functions 259
- Using EMS 263

XMS: Thanks For The Memory 268

- XMS Error codes 269
- XMS Functions 269

The Flat Memory Model: The Solution To Your Memory Problems 276

- The technical background for the flat model 276
- How the flat model is programmed 277

11 Programming Other PC Components

283

Interrupts 283

The Programmable Interval Timer (PIT) 286

- The PIT hardware 286
- The control register 287
- The counter register 288
- Using the PIT 289

The Programmable Interrupt Controller (PIC) 291

- Maskable interrupts 292
- Nonmaskable interrupts 293
- Hardware interrupts 293
- Software interrupts 293

The DMA Controllers 293

- Masking a DMA channel 294
- Setting the transfer mode 295
- Clearing the DMA flip-flop 297
- Adjusting the size of a DMA transfer 298

The Real Time Clock (RTC) 300

- Clock functions 301
- Status registers 302
- Configuration bytes 303
- The RTC in practice 305

12 Experience Sonic Worlds: The Sound Blaster Card

311

Sound Blaster Card Components 311

- Programming the signal processor: The DSP 311
- Detecting the Sound Blaster card 323
- Mixing sound data: The mixer chip 325
- SB16 (ASP) mixer chip registers 327

Index 539

Thank you for purchasing PC Underground. We hope you enjoy experimenting with all the programs we've included on the companion CD-ROM. We're certain you'll learn a lot about "underground" programming.

As you read through PC Underground you'll see several program listings which are highlighted. These listings may be part of a program or the entire program which you'll find on the companion CD-ROM. To help you identify the program, the program or file name is shown in a icon which usually appears near the beginning of the program listing. An example of this icon appears to the right.

*You can find
SQUEEZE.PAS
on the companion CD-ROM*

Please note that due to space limitations and column width, a few programs may not appear exactly the same as the program on the companion CD-ROM. Therefore, you should use the programs from the companion CD-ROM whenever possible.

For more information on how to use the companion CD-ROM please read Chapter 16 "Look What's On The Companion CD-ROM". It lists the directories and files and how they are installed.
