### Message

You must select a range. Graphical objects cannot be used with Microsoft Access.  
The information on charts or modules cannot be used with Microsoft Access. Select a worksheet containing a data table.  
The selected database cannot be opened.  
Unexpected error converting to Microsoft Access.  
The database filename is invalid or the file does not exist.  
A new database cannot be created.  
Unexpected error creating Microsoft Access form or report.  
Cannot find the name of the Microsoft Access form.  
Cannot find the name of the Microsoft Access report.  
You must save a new workbook before converting it to Microsoft Access.  
This command requires Microsoft Access 97, which is either not installed or not setup correctly.  
Cannot open the form or report associated with this list.  
You must save a new workbook before using it to create a Microsoft Access form, report or table.  
Cannot start the Microsoft Access Excel Import Wizard.  
No list found. Select a single cell within your list and Microsoft Excel will find the rest of the list for you.  
You cannot use this command when your workbook is shared, or when you are tracking changes.  
You cannot use this command in a Binder or when your worksheet is embedded in another document.  
You cannot use this command when your workbook is read-only.  
Cannot start Microsoft Access form or report wizard.
